Mathematics Achievement in the Primary School Years Ina V. S. Mullis 1997

The Third International Mathematics and Science Study (TIMSS) is the largest and most ambitious international comparative study designed to provide policy makers, educators, researchers, and practitioners with information about educational achievement and learning contexts. Data were collected from 45 countries in more than 30 different languages. Five grade levels

were tested in the two subject areas, totaling more than half a million students tested around the world. The six content dimensions covered in the TIMSS mathematics tests given to the primary school students include: whole numbers; fractions and proportionality; measurement, estimation, and number sense; data representation, analysis, and probability; geometry; and patterns, relations, and functions. The results in this report describe students' mathematics achievement at both the third and fourth grade levels. About one quarter of the questions were in the free-response format requiring students to generate and write their answers. Chapters include: (1) "International Student Achievement in Mathematics"; (2) "Average Achievement in the Mathematics Content Areas"; (3) Performance on Items within Each Mathematics Content Area"; (4) "Students' Backgrounds and Attitudes towards Mathematics"; (5) "Teachers and Instruction". Appendices contain an overview of TIMSS procedures, the test-curriculum matching analysis, and percentiles and standard deviations of mathematics achievement. (JRH)

**Designing Assessment for Mathematics**

Eileen Depka 2007-05-31 "Clearly demonstrates how to design rubrics for math, a content area that desperately needs support. The use of rubrics combined with performance tasks helps educators teach math at a higher, more engaging level. A must-have book for all educators seeking to build a strong thinking-based math program." —Lee Ann Cervini, Principal, Holley Elementary School, NY "Makes a distinct contribution to the field. Not only does the text clearly explain how to create rubrics and performance tasks in a step-by-step manner, each chapter also provides an example for immediate use in the classroom." —Marcia Carlson, Sixth-Grade Teacher, Crestview Elementary School, Clive, IA Enhance students' understanding of math concepts through rubrics and hands-on learning! Teaching mathematics in today's world requires practices and procedures integrated with performance tasks that actively involve students. In this second edition of

Designing Rubrics for Mathematics, Eileen Depka clarifies the purpose of rubrics in math instruction and illustrates the relationship between assessment, rubrics, and the National Council of Teachers of Mathematics' Principles and Standards for School Mathematics (2000). Each chapter in this research-based updated edition offers easy-to-use strategies, suggestions, creative sample problems, and tasks to engage students in hands-on learning while allowing them to have fun in the process. With two new chapters focused on communication to deepen students' understanding of math concepts and using rubric data to improve instruction, this resource provides teachers with: Reflective activities to use with students for metacognitive processing Strategies for creating standards-linked rubrics, plus samples Tips for differentiating performance tasks How-to's for student-created rubrics Internet resource links for rubric development, mathematical focal points, and standards Designing Assessment for Mathematics, Second Edition, demonstrates how to drive instruction and successfully boost achievement levels by providing students with experiences that impact their learning and performance.

**Teaching Secondary Mathematics** Alfred S. Posamentier 2006 For courses in Secondary Mathematics Methods. Teaching Secondary Mathematics: Techniques and Enrichment Units, 7th edition has been thoroughly revised to discuss current methods of teaching mathematics, considering all aspects and

responsibilities of the job, beginning with a brief overview of the history of mathematics education and how it has evolved over time to include standards for teaching and assessment. The authors address how to craft rich and effective daily lesson plans, and how to use a variety of instructional tools and strategies to reach all students in a classroom. Problem solving is a key focus from its instructional underpinnings to its recreational and motivational aspects. The second part of the text provides mathematics teachers with a collection of enrichment units appropriate for the entire secondary school curriculum spectrum. *Assessment Alternatives in Mathematics* Jean Kerr Stenmark 1989 "This is a review of methods to assess students' real mathematics achievement, including looking at students' completed tasks or products (portfolios, writing, investigations, and open-ended questions) and at students' performance or how they are working (through observations, interviews, and questions). It also discusses student self-assessment, gives sample problems, and raises issues that need to be considered."--Publisher's description.
