Leading Equity-Focused Inquiry for Continuous School

Improvement Margaret Terry Orr This book offers a roadmap for

conducting continuous school improvement work, illustrating the

common stages of the process. Using improvement science principles

and an equity perspective, this book demonstrates how schools and

districts can increase their efficacy and how teachers and leaders can

improve their practice for the benefit of all students. Through eight case

studies representing a variety of K-12 school and community settings,

the authors address a range of critical student needs in literacy, math,

special education, and social learning. Each case describes how the

leaders and their staff engaged in careful exploration of specific

problems and their causes, as well as their thoughtful development and

testing of solutions. The text analyzes how the leaders, their teachers,

and other staff gained collaborative inquiry capacities and reduced

inequities to improve student outcomes, particularly for those most

challenged. Each case concludes with leaders' reflections and discussion

questions to prompt others engaging in similar work. A summative

chapter reflects on the leadership lessons for equity-focused

improvement efforts. Book Features: Explains how school leaders used

improvement-science-informed processes to address common problems

of practice.Offers a roadmap for conducting continuous school

improvement work, illustrating the common stages of the

process.Provides cases from a diverse range of school and district

settings, including urban and suburban schools; elementary, middle, and

high schools; and specialized schools.Illustrates each case study with

fishbone and driver diagrams and Plan-Do-Study-Act (PDSA)

cycles.Includes reflection and discussion questions appropriate for

individual readers, education courses, and book study groups.
