Encyclopedia of Police Science Jack Raymond Greene 2006-10-23 In 1996, Garland published the second edition of the Encyclopedia of Police Science, edited by the late William G. Bailey.

The work covered all the major sectors of policing in the US. Since then much research has been done on policing issues, and there have been significant changes in techniques and in the American police system. Technological advances have refined and generated methods of investigation. Political events, such as the terrorist attacks of September 11, 2001 in the United States, have created new policing needs while affecting public opinion about law enforcement. These developments appear in the third, expanded edition of the Encyclopedia of Police Science. 380 entries examine the theoretical and practical aspects of law enforcement, discussing past and present practices. The added coverage makes the Encyclopedia more comprehensive with a greater focus on today's policing issues. Also added are themes such as accountability, the culture of police, and the legal framework that affects police decision. New topics discuss recent issues, such as Internet and crime,

international terrorism, airport safety, or racial profiling. Entries are contributed by scholars as well as experts working in police departments, crime labs, and various fields of policing. Delinquency in Society Robert M. Regoli 2006 A reflection of what we learn from the comments and suggestions of our students, our colleagues, and their students around the country who read the book.

Race, Ethnicity, and Policing Stephen K Rice 2010-03-01 From Rodney King and "driving while black" to claims of targeting of undocumented Latino immigrants, relationships surrounding race, ethnicity, and the police have faced great challenge. Race, Ethnicity, and

Policing includes both classic pieces and original essays that provide the reader with a comprehensive, even-handed sense of the theoretical underpinnings, methodological challenges, and existing research necessary to understand the problems associated with racial and ethnic profiling and police bias. This path-breaking volume affords a holistic approach to the topic, guiding readers through the complexity of these issues, making clear the ecological and political contexts that surround them, and laying the groundwork for future discussions. The seminal and forward-thinking twenty-two essays clearly illustrate that equitable treatment of citizens across racial and ethnic groups by police is one of the most critical components of a successful democracy, and that it is only when agents of social control are viewed as efficient, effective, and legitimate that citizens will comply with the laws that govern their society. The book includes an introduction by Robin S. Engel and contributions

from leading scholars including Jeffrey A. Fagan, James J. Fyfe, Bernard E. Harcourt, Delores Jones-Brown, Ramiro Martínez, Jr., Karen F. Parker, Alex R. Piquero, Tom R. Tyler, Jerome H. Skolnick, Ronald Weitzer, and many others.

Racial Profiling Michael L. Birzer 2012-11-14

Many racial minority communities claim profiling occurs frequently in their neighborhoods. Police authorities, for the most part, deny that they engage in racially biased police tactics. A handful of books have been published on the topic, but they tend to offer only anecdotal reports offering little reliable insight. Few use a qualitative methodol

An Evaluation of Racial Profiling Data Collection and Training Michael Cohen 2002
Racial Profiling Steven J. Muffler 2006 In recent years, racial profiling has drawn the attention of state and federal governments. In this book, racial profiling is defined as the practice of targeting individuals for police or security interdiction, detention, or other disparate treatment based primarily on their race, ethnicity, or national origin in the belief that certain minority groups are more likely to engage in unlawful behaviour. Assertions that

law enforcement personnel at all levels unfairly target certain racial and ethnic groups, particularly but not exclusively for traffic stops and searches, have raised concerns about violations of the Constitution. The major debate on racial profiling centres on whether the practice should be prohibited entirely and whether data on traffic stops and searches should be collected to determine if the practice is occurring. This book gathers presents the major issues, available data, and analyses important to understanding on the most dangerous and divisive practices of our time.
