**Hacker Disassembling Uncovered, 2nd ed**

Kris Kaspersky 2007 Going beyond the issues of analyzing and optimizing programs as well as creating the means of protecting information, this guide takes on the programming problem of how to go about disassembling a program with holes without its source code. Detailing hacking methods used to analyze programs using a debugger and disassembler such as virtual functions, local and global variables, branching, loops, objects and their hierarchy, and mathematical operators, this guide covers methods of fighting disassemblers, self-modifying code in operating systems, and

executing code in the stack. Advanced disassembler topics such as optimizing compilers and movable code are discussed as well, and a CD-ROM that contains illustrations and the source codes for the programs is also included.

**The Discipline of Data** Jerald Savin 2023-07-06 Pulling aside the curtain of ‘Big Data’ buzz, this book introduces C-suite and other non-technical senior leaders to the essentials of obtaining and maintaining accurate, reliable data, especially for decision-making purposes. Bad data begets bad decisions, and an understanding of data fundamentals — how data is generated, organized, stored, evaluated, and maintained — has never been more important when solving

problems such as the pandemic-related supply chain crisis. This book addresses the data-related challenges that businesses face, answering questions such as: What are the characteristics of high-quality data? How do you get from bad data to good data? What procedures and practices ensure high-quality data? How do you know whether your data supports the decisions you need to make? This clear and valuable resource will appeal to C-suite executives and top-line managers across industries, as well as business analysts at all career stages and data analytics students.

*Critical Cinema* Clive Myer 2011 *Critical Cinema: Beyond the Theory of Practice* purges the obstructive line between the making of and the theorising on film, uniting theory and practice in order to move beyond the commercial confines of Hollywood. Opening with

an introduction by Bill Nichols, one of the world's leading writers on nonfiction film, this volume features contributions by such prominent authors as Noel Burch, Laura Mulvey, Peter Wollen, Brian Winston and Patrick Fuery. Seminal filmmakers such as Peter Greenaway and Mike Figgis also contribute to the debate, making this book a critical text for students, academics, and independent filmmakers as well as for any reader interested in new perspectives on culture and film.
