Effective Crisis

Communication Robert R.

Ulmer 2017-12-11 In this fully updated Fourth Edition of Effective Crisis

Communication, three of today's most respected crisis/risk communication scholars provide the latest theories and innovative approaches for handling crisis. Unlike other crisis

communication texts, this acclaimed book answers the question, "what now?" and explains how organizations can create the potential for opportunity, renewal, and growth through effective crisis communication. Authors Robert R. Ulmer, Timothy L.

Sellnow, and Matthew W.

Seeger provide guidelines for taking the many challenges that crises present and turning those challenges into opportunities. Practical lessons and in-depth case studies highlight successes and failures in dealing with core issues of crisis leadership, including managing uncertainty, communicating effectively, understanding risk, promoting communication ethics, enabling organizational learning, and producing renewing responses to crisis. New to the Fourth Edition: New and updated examples and case studies include diverse cases from recent headlines such as SeaWorld's reaction to Blackfish, the United Airlines debacle, and the Flint Water Crisis. Updated theories and references throughout provide readers with the latest information for effective crisis communication. *Creating Literacy Instruction for All Students* Thomas G. Gunning 2005 With its inclusive view of literacy, *Creating Literacy Instruction*

for All Students emphasizes methods that have been validated by research and practice, while delivering the basics of all major aspects of reading and writing. The Fifth Edition of this best-selling book continues to be a comprehensive, practical text that provides its readers with step-by-step guidance for teaching reading and writing. Written by distinguished author Tom Gunning, this text features sample lessons for virtually every major literacy skill/strategy and offers numerous reinforcement suggestions and generous listings of materials. With its careful balance between the theory and the practice, readers are always given the theories behind the methods, encouraging them to choose, adapt, and construct their own approaches as they create a balanced program of literacy instruction. Special emphasis has been given to adapting instruction for English language learners, struggling readers and writers, and special needs students

throughout the book. Unlike comparable texts, the new edition stresses effective steps for closing the gap between achieving and struggling readers as mandated by the No Child Left Behind legislation and Reading First.
