Femtocells Marcus Wong 2022-09-01 With
Femtocell popularities and deployments on the
rise, a number of Femtocell security breach has
been reported as a result of pre-standards
versions of Femtocells that did not conform to
published standards or implemented as a result
of lack of understanding of basic security
principles. A considerable amount of effort has
been devoted, both in industry forums and
standards developing organizations, towards
creating technical specifications for the
architecture, operational, and security of the
Femtocells. Security remains on the minds of
operators as the traditionally closed operator
core network opens up with the Femtocells

extending into the homes of users and potential hackers with more and more powerful tools. Technical topics discussed in the book include:• UMTS/LTE Femtocell security and threat analysis;• CDMA Femtocell security;• WiMAX Femtocell security;• LIPA and SIPTO security;• Small Cells;Femtocells: Secure Communication and Networking provides an in-depth analysis and research results on the security design of Femtocells based on UMTS, LTE, CDMA and WiMAX access technologies. Threat analysis, security requirements as well as security mechanisms used to counter the threats and potential attacks are provided in details covering every aspect of Femtocell security. Femtocells: Secure Communication and Networking is ideal for personnel in communication, networking and security industries as well as academic staff and master/research students in network security, computer science, operational research, electrical engineering and telecommunication systems and the Internet.
