Healthcare Education in Nigeria Joseph A. Balogun 2020-12-30 This book provides a comprehensive and authoritative assessment of the training of health professionals in Nigeria, looking back to how health care education has evolved in the country over time, before investigating new and emerging trends. The book begins with a discussion of the fundamentals of health care education, the art of teaching health care students, and modeling professionalism in health care. The book highlights the work of pioneer Nigerian health care academics, and explores the administration of health care education at departmental level. Finally, it highlights the role of elite Nigerian health care academics in the diaspora, chronicles contemporary challenges in health care education, and makes recommendations for reform. This book will be of interest to students, scholars, and practitioners working on health care education in Africa.

Health Professions in Nigeria Joseph Abiodun Balogun 2021-10-18 This book provides a unique assessment of the Nigerian healthcare system's different professions. It begins by examining the fundamentals of health professions to contextualize the issues explored in the book in more detail. It goes on to present the hierarchy of occupations, professionalization, and the evolutionary path and socialization milestones that occupations attempting to attain true professions' status and power transcend. It also analyses the differences between professional autonomy, direct access, and independent practice. The latter parts identify Nigeria's primary healthcare professions and

vocational careers and discuss their central roles, each discipline's specialty; including the biography of 35 notable pioneer Nigerian healthcare professionals during the 19th and early 20th centuries. The book concludes by analyzing the causes and adverse impacts of interprofessional conflict and industrial action within the Nigerian healthcare system and proposes the interdisciplinary team concept as a panacea for both conundrums.
