*Enriching Esol Pedagogy* Vivian Zamel 2002-12-18 Enriching ESOL Pedagogy: Readings and Activities for Engagement, Reflection, and Inquiry is a collection of thought-provoking articles and activities designed to engage practicing and prospective ESOL teachers in an ongoing process of reflecting on, critically examining, and investigating theory and practice. Its twofold purpose is to provide a theoretical perspective and to offer ways for making the teaching of English to speakers of other languages (ESOL) meaningful for both teachers and learners. Underlying the activities and the readings themselves is the assumption that teachers need to play a role in exploring, shaping, and theorizing the work they do. The readings included represent a range of genres. They are informed by a common philosophical perspective about language acquisition and treat language teaching and learning holistically. The book is organized into five integrated units that: \* raise questions about conventional notions of methods; \* take into account the complicated nature of real classrooms; \* provide theoretical principles for teaching that promotes language acquisition; \* include rich descriptions of actual classroom experiences; and \* question assumptions about language and literacy. Each set of readings begin with a "Before Reading" section and is followed by "Reflecting on the Readings," "Reading for Further Reflection," and "Suggested Projects for Inquiry" sections. This volume is a valuable resource for practicing and prospective teachers in the field of TESOL who work with diverse student populations--at all levels--in both mainstream and ESL/bilingual settings.

*Approaches and Methods in Language Teaching* Jack C. Richards 2001-04-09 In addition to the approaches and methods covered in the first edition, this edition includes new chapters, such as whole language, multiple intelligences, neurolinguistic programming, competency-based language teaching, co-operative language learning, content-based instruction, task-based language teaching, and The Post-Methods Era. *English Language Teaching in China* Jun Liu 2007 This book examines the importance of English language teaching in China, but also the need for this teaching to be modernised in order for China to better join the world economy. The current trend within English teaching in China is for 'communicative competence' - that is, being able to communicate with linguistic, pragmatic, discourse and strategic competence. This volume argues that such a theoretical framework of communicative competence needs to be expanded to address both global needs and local contexts, if English language teaching in China is to be successful. The contributors to this volume examine every aspect of language teaching and suggest

new ways in which communication and grammar can be balanced. The chapters include coverage of: \* the importance of English in a global world \* the theoretical framework of communicative competence \* the role of grammar in learning English \* assessing and evaluating communicative competence \* the starting age of learning English \* teaching language skills in the post-methods era \* using multimedia in teaching and testing \* online learning and self-learning \* teacher training through empowerment. With its balance of theory and practice, and internationally renowned contributors, this guide to new approaches, perspectives and standards in language teaching will be essential reading for academics interested in applied linguistics and second language acquisition, and English language teaching professionals. Teaching by Principles H. Douglas Brown 1994 ESL/EFL teachers and trainees will welcome this methodology text, which considers all practical classroom techniques and activities in terms of solid foundation stones of research on second language acquisition. -- Readers develop an overall approach to language teaching from which their classroom practices can emerge. -- The text has user-friendly, readable prose, interactive end-of-chapter exercises for discussion and action, and end-of-chapter recommendations for further reading.
