Exploring 6-10 Bev Dunbar 2002 Covers over 100 teacher-led activities that encourage young children to think mathematically by exploring, experimenting and being creative. Assessment is built into tasks, and each book includes a bank of photocopiable resource sheets linked to activities.

View and Do Maths Problem Solving Ann Baker 2011 "Today's students live in a media-rich world where information is presented visually and electronically. Why not harness student's responsiveness to video-based media as a way of introducing and engaging them in mathematical investigations and problems?" "Students watch the video to find out the problem and then work out their own strategies to find the solution. They then compare their strategies with those presented by the two characters. A challenge problem (or further complication) is also presented at the end of each scenario for students to solve." "The three levels of books and accompanying DVDs in this series feature the same scenarios and characters but with increasingly complex problems to solve."--Back cover.
