Television in Black-and-white America Alan Nadel 2005 La couverture indique : "Alan Nadel's new book reminds us that most of the images on early TV were decidedly Caucasian and directed at predominantly white audiences. Television did not invent whiteness for America, but it did reinforce it as the norm - particularly during the Cold War years. Nadel now shows just how instrumental it was in constructing a narrow, conservative, and very white vision of America." "During this era, prime-time TV was dominated by "adult Westerns," with heroes like The Rebel's Johnny Yuma reincarnating Southern values and Bonanza's Cartwright family reinforcing the notion of white patriarchy

- programs that, Nadel shows, bristled with Cold War messages even as they spoke to the nation's mythology. America had become visually reconfigured as a vast Ponderosa, crisscrossed by concrete highways designed to carry suburban white drivers beyond the moral challenge of racism, racial poverty, and increasingly vocal civil rights demands."

Complex Serial Drama and Multiplatform Television Trisha Dunleavy 2017-11-22 This book examines the creative strategies, narrative characteristics, industrial practices and stylistic tendencies of complex serial drama. Exemplified by shows like HBO's *The Sopranos*, AMC's *Mad Men* and *Breaking Bad*, Showtime's *Dexter*, and Netflix's *Stranger Things*, complex serials are distinguished by their conceptual originality, narrative complexity, transgressive lead characters and serial allure. As a drama form that continues to expand and diversify in today's television, HBO's *Boardwalk Empire* and *Game of Thrones*, Netflix's *Orange Is the New Black* and Hulu's *The Handmaid's Tale* provide further examples. Dunleavy investigates the strategies that underpin the innovations, influence and

success of complex serial drama, giving students and scholars a nuanced understanding of this contemporary TV form.

Media Ownership and Concentration in America
Eli M. Noam 2009-10-19 People have worried for many years about the concentration of private power over the media, as evidenced by controversy over Federal Communication Commission rulings on broadcast ownership limits. The fear, it seems, is of a media mogul with a political agenda: a new William Randolph Hearst who could help start wars or run for political office using the power of the media. In the light of these concerns about freedom of speech, Eli Noam provides a comprehensive survey of media concentration in America, covering everything from the early media empire of Benjamin Franklin to the modern-day cellular phone industry.

Free-for-all Matthew Fraser 1999 We are in the midst of a communications revolution - a free-for-all, in which several major players and a group of new media upstarts are vying for the power to transform our lives. It is a contest being waged at high speed, with great rancour, new rules and incomprehensibly rich profits. Who will win this struggle for supremacy?

Branding Television Catherine Johnson 2012-03-12 Branding Television examines why and how the UK and US television industries have turned towards branding as a strategy in response to the rise of satellite, cable and digital television, and new media, such as the internet and mobile phone. This is the first book to offer a sustained critical analysis of this new cultural development. Branding Television examines the industrial, regulatory and technological changes since the 1980s in the UK and the USA that have

led to the adoption of branding as broadcasters have attempted to manage the behaviour of viewers and the values associated with their channels, services and programmes in a world of increased choice and interactivity. Wide-ranging case studies drawn from commercial, public service, network and cable/satellite television (from NBC and HBO to MTV, and from BBC and Channel 4 to UKTV and Sky) analyse the role of marketing and design in branding channels and corporations, and the development of programmes as brands. Exploring both successful and controversial uses of branding, this book asks what problems there are in creating television brands and whether branding supports or undermines commercial and public service broadcasting. Branding Television extends and complicates our understanding of the changes to television over the past 30 years and of the role of branding in contemporary Western culture. It will be of particular interest to students and researchers in television studies,

but also in creative industries and media and cultural studies more generally.
