An Introduction to the Assurance of Human Performance in Space Systems Martin Marietta Corporation. Baltimore Division 1968
Proceedings of the FAO Global Conference on Sustainable Plant Production Telemans, B. 2023-06-13 FAO organized its first ever Global Conference on Sustainable Plant Production (GPC) (Rome, 2 to 4 November 2022), with a focus on Innovation, Efficiency and Resilience. Its main objective was to provide a neutral forum for FAO Members, farmers, scientists, development agencies, policy makers, extensionists, civil society, opinion leaders and the private sector to engage in dialogues around sustainable plant production. To achieve impact towards implementing the 2030 Agenda, the GPC developed 20 actionable recommendations. The recommendations encompass all the thematic areas highlighted in the GPC, with a focus on adaptation to local contexts, needs of small-scale farmers, and include cross-cutting issues to guide active innovation for global sustainable plant production systems. The recommendations clearly establish (i) priorities for targeted

mobilization and pooling of scientific, technical and financial resources; (ii) evidence and knowledge sharing through the creation and management of functional technical networks; and (iii) testing and scaling evidence-based sustainable plant production practices, partnerships and policies.

Environmental Integration in Competition and Free-Movement

Laws Julian Nowag 2016-11-17 Environmental Integration in Competition and Free-Movement Laws engages in a comprehensive analysis of the obligation of Article 11 TFEU (integration of environmental protection requirements) in the three core areas of EU internal market law: competition, state aid, and free movement. It develops a theoretical framework for integrating environmental and other policies and compares how environmental integration takes place within competition, state aid, and free movement law. In turn, it paves a way for a more transparent and consistent integration of environment protection in these three core areas of law. Structured in three parts, this volume (I) offers a detailed analysis of the historical development of environmental integration including discussions of the various intergovernmental conferences which led to a number of Treaty changes, shaping the obligation itself. (II) It investigates which provisions and concepts within competition law, state aid law, and the market freedoms can be interpreted in order to provide a clear demarcation of environmental protection and these areas of law. (III) It analyses how competition, state aid, and free movement law allow for a balancing of the environment against restrictions in cases of conflict.

Political, Social, Religious and Economic Challenges in the Middle East and North Africa

Flavia Cortelezzi 2025-12-23 A decade after the "Arab springs", the book aims to provide a concise perspective on the political, social and economic challenges of the southern shore of the Mediterranean a decade after the "Arab springs". The volume, both from a sociolegal and economic perspective, aims to offer readers an analytical and up-to-date picture of the transformations in several particularly significant countries in the area under consideration. The volume thus covers the entire north African and near Eastern coastal belt, from Morocco to Lebanon, and extends its focus into the Gulf. In particular, keeping in the background the Agenda 2020-2030, the book explores, on the one side, the role of the religious factor in the transformation of the constitutional orders and, on the other, the perspectives of economies of MENA region in the decade that followed the "Arab springs". In a different way, the Arab springs were characterized, from a constitutional point of view, by the attempt at a different relationship between political power and religion. This new arrangement, particularly evident in the Tunisian Constitution, but not absent in other contemporary experiences, was associated with favorable and expanding economic prospects. The book questions the relevance of this reading and how economic and political factors affected subsequent transformations. The situation of each country is individual in that it differs depending on many factors, starting with historical and geographical factors that have profoundly influenced social, political and economic structures. What is to be expected for the MENA region in the light of Agenda 2020-2030? Which are the major opportunities for growth and reform and which are the main risks? By adopting a multidisciplinary approach this book will offer a comprehensive picture of the main political and economic challenges for MENA region.
