Writing Qualitative Research on Practice 2009-01-01

Writing Qualitative Research on Practice brings together key authors in the field of qualitative research to critique current trends and expand discourse about the challenges and practices of writing qualitative research. This book is located in the context of professional practice and the

practice world. It scopes and maps the broad horizons of qualitative research on practice and explores writing in major qualitative research traditions. A key issue addressed in writing qualitative research, particularly the narrative forms, is finding a way to write that encapsulates the goals and genre of the research project. Writing is presented as a process and journey and also a way of thinking and creating knowledge. Within research, writing is an essential expression of the research frame of reference and a key element of the research genre. This book explores writing for a range of publications including books, chapters, theses and papers for journals. The practical and accessible style of this book makes it an invaluable resource for postgraduate research students, teachers and supervisors and scholars of

qualitative research.

The New Century Handbook

Christine A. Hult 2008 The New Century, Fourth Edition, provides the answers today's students need as writers and researchers in an electronic age. This handbook shows students how to use new technologies to make appropriate rhetorical choices and to become more successful college writers in all of their courses, while also providing clear, comprehensive coverage of handbook basics--writing, grammar and usage, research, and documentation. Authors Christine Hult and Tom Huckin bring their expertise in research, computers and writing, grammar, and

linguistics and their extensive experience in teaching first-year composition to this remarkable handbook--a handbook that is accessible, flexible, comprehensive, and current, and that speaks to students in today's language. More than any other handbook, The New Century addresses the primary concerns of composition students: how to understand and avoid plagiarism, how to write for courses beyond English, how to make correct grammatical and stylistic choices, and how to use technology to help them become better writers.
