**McGraw-Hill's National
Electrical Code 2020
Handbook, 30th Edition**

Frederic P. Hartwell
2021-04-23 The definitive guide to the National Electric Code—thoroughly revised for 2020 rules and regulations Updated to fully align with the 2020 NEC, this trusted on-the-job reference contains plain-language explanations, advice, and analysis for every provision. You will get discussions of the rationale behind specific rules that enhances your understanding of both meaning and application. This handbook features thousands of detailed diagrams and photos as well as in-depth discussions regarding controversial wording and actual errors, together with

possible approaches to discussions with inspectors regarding how to cope with these issues. This book is not published by NFPA, and is therefore free to confront such topics head on. Written by a senior member of the NEC Code Committee, McGraw Hill's National Electrical Code (NEC) 2020 Handbook, 30th Edition is logically arranged and serves as a companion to the Code itself—the explanation for any topic lines up exactly with the applicable section in the Code. The book does not reproduce the Code, and therefore every column inch is devoted to explaining its provisions. You will get straightforward clarification of obtuse rules and vague language, enabling you to work efficiently and safely—and to achieve full compliance. Covers all significant changes to the 2020 NEC, including:

- Reconditioned equipment
- Massive expansion of GFCI requirements
- New receptacle coverage rules for kitchen islands and peninsulas
- Total revision of non-dwelling

lighting load calculations
Elimination of common enclosures for service disconnects
Exterior emergency disconnects
Rules for stair towers
New EGC fill calculations for boxes
Temperature limits for LFMC and LFNC
Latest developments for PV systems

diagrams and photos. The authoritative information and insight contained in this on-the-job reference will help your work pass inspection the first time. Covers all significant changes in the 2014 NEC, including: Low Voltage Direct Current Distribution Systems (new Article 393) Modular Data Centers (new Article 646) Fire Resistive Cable Systems (new Article 728) Energy Management Systems (new Article 750) Global changes to

hazard warning labels and centralization of rules for lockout mechanisms, along with extensive increases of permitted utilization voltage from 600 to 1000 Coverage throughout the NEC® of DC systems due to expanding usage Critical expansion of both requirements for and acceptable strategies to provide AFCI protection
