The Humongous Book of Statistics Problems Robert Donnelly 2009-12-01

Learn to solve statistics problems—and make them no problem! Most math and science study guides are dry and difficult, but this is the exception. Following the successful *The Humongous Books* in calculus and algebra, bestselling author Mike Kelley takes a typical statistics workbook, full of solved problems, and writes notes in the margins, adding missing steps and simplifying concepts and solutions. By learning how to interpret and solve problems as they are presented in statistics courses, students prepare to solve those difficult problems that were never discussed in class but are always on exams. There are also annotated notes throughout the book to clarify each problem—all guided by an author with a great track record for helping students and math enthusiasts. His website (calculus-help.com) reaches thousands of students every month.

The best-selling author of *The Complete Idiot's Guide® to Calculus* has taken what appears to be a typical calculus workbook, chock full of solved calculus problems, and made legible notes in the margins, adding missing steps and simplifying solutions. Finally, everything is made perfectly clear. Students will be prepared to solve those obscure problems that were never discussed in class but always seem to find their way onto exams. -- Includes 1,000 problems with comprehensive solutions -- Annotated notes throughout the text clarify what's being asked in each problem and fill in missing steps -- Kelley is a former award-winning calculus teacher

Figure It Out, Henri Weldon Tanita S. Davis 2023-01-17 Tanita S. Davis, author of *Partly Cloudy* and *Serena Says*, has written another funny, warm story featuring middle school and family life—all about the complex calculations it takes for everyone to balance the equations of their lives and what it takes to be part of a team while handling a learning disability. This middle grade novel is perfect for fans of *From the Desk of Zoe Washington* and *A Good Kind of Trouble*. Seventh grader Henrietta Weldon gets to switch schools—finally! She'll be “mainstreaming” into public school, leaving her special education school behind. She can't wait for her new schedule, new friends, and new classes. Henri's dyscalculia, a learning disability that makes math challenging to process and understand, is what she expects to give her problems. What she doesn't expect is a family feud with her sister over her new friends, joining the girls' soccer team, and discovering poetry. Henri's tutor and new friend, Vinnie, reminds her to take it slow. One problem at a time. If Henri Weldon has twenty-four hours in a day, and she has two siblings who dislike her four new friends, two hours of soccer practice, seven hours of classes, and three hours of homework . . . she has: A. No free time B. No idea how to make everyone happy C. No time to figure it out, Henri Weldon!
