Public Value and Public Administration John M. Bryson 2015-08-18

Governments and nonprofits exist to create public value. Yet what does that mean in theory and practice? This new volume brings together key experts in the field to offer unique, wide-ranging answers. From the United States, Europe, and Australia, the contributors focus on the creation, meaning, measurement, and assessment of public value in a world where government, nonprofit organizations, business, and citizens all have roles in the public sphere. In so doing, they demonstrate the intimate link between ideas of public value and public values and the ways scholars theorize and measure them. They also add to ongoing debates over what public value might mean, the nature of the most important public values, and how we can practically apply these values. The collection concludes with an extensive research and practice agenda conceived to further the field and mainstream its ideas. Aimed at scholars, students, and stakeholders ranging from business and government to nonprofits and activist groups, *Public Value and Public Administration* is an essential blueprint for those interested in creating public value to advance the common good.

Performance Management and Evaluation Steffen Bohni Nielsen

2013-03-18 This issue focuses on connections between performance management and evaluation, a contentious topic at the moment. It does so by placing evaluation and monitoring under the overarching concept of performance management, and then by investigating five complementarities between performance monitoring and measurement on the one hand, and evaluation on the other. These complementarities are: Sequential Informational Organizational Methodical Hierarchical. Several case studies discuss the uses and complementarities of evaluation and performance management in contexts including national and local governments and the work of government, philanthropic foundations, and a direct-service nonprofit agency. These cases illustrate the advantages and pitfalls in utilizing evaluative approaches within the context of performance management. This is the 137th volume of the Jossey-Bass quarterly report series *New Directions for Evaluation*, an official publication of the American Evaluation Association.
