The Economics of Sports Michael A. Leeds
2018-04-27 The sports industry provides a seemingly endless set of examples from every area of microeconomics, giving students the opportunity to study economics in a context that holds their interest. Thoroughly updated to reflect the current sports landscape, *The Economics of Sports* introduces core economic concepts and theories and applies them to American and international sports. Updates for this sixth edition include: More coverage of international sports, including European football; A revised chapter on competitive

balance, reflecting new techniques; A brand-new chapter on mega-events such as the Olympics and World Cup; New material on umpire bias; A completely redesigned chapter on amateur competition that focuses exclusively on intercollegiate sports. This chapter is also now modular, enabling instructors who wish to intersperse it with the other chapters to do so with greater ease. This accessible text is supported by a companion website which includes resources for students and instructors. It is the perfect text for advanced undergraduate and graduate courses on sports economics.
8th RILEM International Symposium on Testing and Characterization of Sustainable and Innovative Bituminous Materials Francesco Canestrari 2015-09-24 This work presents the results of RILEM TC 237-SIB (Testing and

characterization of sustainable innovative bituminous materials and systems). The papers have been selected for publication after a rigorous peer review process and will be an invaluable source to outline and clarify the main directions of present and future research and standardization for bituminous materials and pavements. The following topics are covered: - Characterization of binder-aggregate interaction - Innovative testing of bituminous binders, additives and modifiers - Durability and aging of asphalt pavements - Mixture design and compaction analysis - Environmentally sustainable materials and technologies - Advances in laboratory characterization of bituminous materials - Modeling of road materials and pavement performance prediction - Field measurement and in-situ characterization - Innovative materials for reinforcement and interlayer systems - Cracking and damage characterization of asphalt pavements - Recycling and re-use in road pavements This is

the proceedings of the RILEM SIB2015 Symposium (Ancona, Italy, October 7-9, 2015).

Coastal Disaster Risk Management in

Bangladesh Mahbuba Nasreen 2023-03-31 This book addresses disaster and disaster risk reduction (DRR) practices, constraints and capacity in the context of coastal Bangladesh. Located in the lower riparian of the Bay of Bengal, Bangladesh has to face frequent disasters such as floods, cyclones, river erosion, salinity intrusion as well as drought. Drawing together a range of multidisciplinary perspectives, Coastal Disaster Risk Management in Bangladesh explores the connection between climate change and DRR issues in this region. The editors reorganize disaster studies around social and physical changes that can reduce these risks and put at risk populations on a stronger footing by making risk reduction the focus. These include measures to improve disaster preparedness, to boost recovery by creating better disaster planning and programs, and physical and social initiatives to improve disaster resilience. Also, analyzing the gender perspective, the volume also utilizes the local

knowledge framework to consider whether these populations have resilient knowledge that needs to be incorporated into initiatives based on advanced technology and perspectives. This book will be of interest to academics, researchers, students, policymakers and practitioners in the field of disaster, DRR and governance, climate change, climate change adaptation (CCA) and the environment.
