**3ds Max 4 Workshop** Duane Loose 2001 The book teaches skills and techniques in a way that not only provides an understanding of MAX X and its functionality but also how to apply those tools to a normal work environment by using a single, comprehensive project. Each chapter contains a section that provides an explanation of the tools, features and techniques being used, some sample exercises for reinforcement, and some of the artistic insight behind the process. The chapter concludes with the "workshop" section, which walks the reader through a series of step-by-step tutorials that culminate into a final, working project by the end of the book. The tear card, color section, tips, notes and sidebars are filled with expert advice and supplemental information and together with the chapter material provide the reader with an invaluable resource that they can return to time and again.

Learning Autodesk VIZ Sham Tickoo 2004 This text is designed as a hands-on supplement to classroom instruction. Major aspects of the software Autodesk VIZ, Release 4, are presented in step-by-step tutorials. These tutorials allow the reader to learn by doing. The procedures outlined in the text are reinforced by printed screen images. The text consists of 17 tutorials. At the end of each tutorial is a Self-Evaluation Test. This measuring device is used to check student progress and understanding of the software and 3D modeling concepts. Five projects are included at the end of the book. These projects are longer and more complex than the other tutorials.
