Forty-five New Force and Motion Assessment Probes Page Keeley 2010 Nationally known science educator

Page Keeley--principal author of the hugely popular, four-volume NSTA Press series Uncovering Students

Ideas in Science--has teamed up with physicist and science educator Rand Harrington to write this first

volume in their new series on physical science. They begin with one of the most challenging topics in

physical science: force and motion. The 45 assessment probes in this book enable teachers to find out what

students really think about key ideas in force and motion. The Teacher Notes, which can be used before and

after administering the probe, provide background information on * the purpose of the probe; * related

concepts; * an explanation--for the teacher--of the force and motion idea being taught;* related ideas in

Benchmarks for Science Literacy and the National Science Education Standards;* research on typical

student misconceptions related to the force and motion concept; and* suggestions for instruction and

assessment.The book specifies grade spans--K-4, 5-8, 9-12--for each probe, based on state and national

standards, and suggests ways to adapt a probe for a different grade span or context.
