The Lost Explorer Conrad Anker 1999-12-22
This is the adventure story of the year -- how Conrad Anker found the body of George Mallory on Mount Everest, casting an entirely new light on the mystery of the explorer who may have conquered Everest seventy-five years ago. On June 8, 1924, George Leigh Mallory and Andrew "Sandy" Irvine were last seen climbing toward the summit of Mount Everest. Clouds soon closed around them, and they vanished into history. Ever since, mountaineers have wondered whether they reached the summit twenty-nine years before Edmund Hillary and Tenzing Norgay. On May 1, 1999, Conrad Anker, one of the world's strongest mountaineers, discovered Mallory's body lying facedown, frozen into the scree and naturally mummified at 27,000 feet on Everest's north face. The condition of the body, as well as the artifacts found with Mallory, including goggles, an altimeter, and a carefully wrapped bundle of personal letters, are important clues in determining his fate. Seventeen days later, Anker free-climbed the Second Step, a 90-foot sheer cliff that is the single hardest obstacle on the north ridge. The first expedition known to have conquered the Second Step, a Chinese team in 1975, had tied a ladder to the cliff, leaving unanswered the question of whether Mallory could have climbed it in 1924. Anker's climb was the first test since Mallory's of the cliff's true difficulty. In treacherous conditions, Anker led teammate Dave Hahn from the Second Step to the summit. Reflecting on the climb, Anker explains why he thinks Mallory and Irvine failed to make the summit, but at the same time, he expresses his awe at Mallory's achievement with the primitive equipment of the time. Stunningly handsome and charismatic, Mallory charmed everyone who met him during his lifetime and continues to fascinate mountaineers today. He was an able writer, a favorite of the Bloomsbury circle, and a climber of legendary gracefulness. The Lost Explorer is the remarkable story of this extraordinarily talented man and of the equally talented modern climber

who spearheaded a discovery that may ultimately help solve the mystery of Mallory's disappearance.

In the Footsteps of Lewis and Clark Wallace G. Lewis 2011-05-18 Although it was 1806 when Lewis and Clark returned to St. Louis after their journey across the country, it was not until 1905 that they were celebrated as national heroes. In the Footsteps of Lewis and Clark examines how public attitudes toward their explorations and the means of commemorating them have changed, from the production of the Lewis and Clark Exposition in 1905 to the establishment of the Lewis and Clark National Historic Trail in 1978 and the celebrations of the expedition's bicentennial from 2003 through 2007. The first significant stirrings of national public interest in Lewis and Clark coincided with the beginning of a nationwide fascination with transcontinental automobile touring. Americans began to reconnect with the past and interact with the history of Western expansion by becoming a new breed of "frontier explorer" via their cars. As a result, early emphasis on local plaques and monuments yielded to pageants, reenactments, and, ultimately, attempts to retrace the route, promoting conservation and recreation along its length. Wallace G. Lewis details the ingenuity that inspired the establishment of the Lewis and Clark National Historic Trail, opening a window to how America reimagines, recreates, and remembers its own past. In the Footsteps of Lewis and Clark will appeal to both scholarly and armchair historians interested in the Western frontier as experienced by both Lewis and Clark and those retracing their steps today.
