**Accounting and Financial System Reform in Eastern Europe and Asia** Robert W. McGee 2005-11-15 Much has been written about the economic and political problems of countries that are in the process of changing from centrally planned systems to market systems. Most studies have focused on the economic, legal, political and sociological problems these economies have had to face during the transition period. However, not much has been written about the dramatic changes that have to be made to the accounting and financial system of a transition economy. This book was written to help fill that gap. This book is the second in a series to examine accounting and financial system reform in transition economies. The first book used Russia as a case study. The present volume in the series examines some additional aspects of the reform in Russia and also looks at the accounting and financial system reform efforts that are being made in Ukraine, Bosnia & Herzegovina, Armenia and five Central Asian republics.

The regulatory framework 3. Preparation of financial statements which conform with IFRS 4. Preparation of consolidated financial statements 5. Analysis and interpretation of financial statements F7 builds on knowledge from F3, or old paper 1.1. New topics introduced at this level are consolidated financial statements, construction contracts, financial instruments and leases. International is now the ACCA main stream. The questions are laid out in sections which match the text chapters. All sections have past exam questions and some also have preparation questions which ease you into the topic. This helps you to organise your revision. You can review the text chapter, and then do the kit questions on that chapter. Our solutions are detailed and also give you advice on how to approach the question and how to get the easy marks.
