The Arts and Crafts of Literacy

Andrea Brigaglia 2017-09-25

During the last two decades, the (re-)discovery of thousands of manuscripts in different regions of sub-Saharan Africa has questioned the long-standing approach of Africa as a continent only characterized by orality and legitimately assigned to the continent the status of a civilization of written literacy. However, most of the existing studies mainly aim at serving literary and historical purposes, and focus only on the textual dimension of the manuscripts. This book advances on the contrary a holistic approach to the study of these manuscripts and gather contributions on the different dimensions of the manuscript, i.e. the materials,

the technologies, the practices and the communities involved in the production, commercialization, circulation, preservation and consumption. The originality of this book is found in its methodological approach as well as its comparative geographic focus, presenting studies on a continental scale, including regions formerly neglected by existing scholarship, provides a unique opportunity to expand our still scanty knowledge of the different manuscript cultures that the African continent has developed and that often can still be considered as living traditions.

Competition Law in South

Africa Precious N. Ndlovu

2018-04-23 Derived from the

renowned multi-volume

International Encyclopaedia of

Laws, this practical analysis of

competition law and its

interpretation in the South

Africa covers every aspect of the subject – the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of competition law. Throughout the book, the treatment emphasizes enforcement, with relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement

system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on the antitrust authorities' powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in the South Africa will welcome this very useful guide, and academics and researchers will appreciate

its value in the study of international and comparative competition law.

Assessing Academic Literacy in a Multilingual Society

Albert Weideman 2020-11-02

South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and, to a much lesser extent, Afrikaans, but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students, not in order to exclude students from higher education but rather to identify those who would

benefit from further development of their ability in order to undertake their degree studies successfully.

The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Nelson Mandela Crain Soudien

2017-03-22 The death of

Nelson Mandela, the great South African fighter for freedom, in December 2013 prompted several colleagues within the World Council of Comparative Education Societies community to come together to think about the significance of his life and his work for education. This book is the result of that coming together. The contributing authors reflect on what his life, the commitments he made and principally the values he took into the struggle for freedom in South Africa mean for education. The point of

departure for the book is that of honouring the man. It begins with the argument that the values for which he stood, namely, the unconditional dignity of all human beings, respect for difference and principally his lifelong commitment to justice, have a special significance for how we as inhabitants of an increasingly connected and interdependent world conduct our personal lives, our relationships with one another and with the material and living space which surrounds us. It is an ecological approach. As the world moves into a twenty-first century where, paradoxically, we know so much and yet appear to understand so little, and so find ourselves struggling to create social lives in which all of us can feel respected, can offer respect to others and live lives free of fear and anxiety, the values for which he stood have specific relevance for how we do the important job of teaching and what we put into it. Mandela poses deeply provocative questions about

the kinds of lives we seek for ourselves and for everybody else around us.

Kaaps in Fokus Frank

Hendricks 2016-11-01 Kaaps as Afrikaanse omgangsvarieteit word deur verskillende outeurs vanuit diverse invalshoeke betrag. Die boek beslaan nege hoofstukke in twee afdelings wat onderskeidelike die taalkundigheid en die kontekstuele gebruike van Kaaps bekyk. Dis gebaseer op referate wat gelewer is by die eerste simposium oor Kaaps in 2012. Kaaps word in die boek voorgedhou as 'n waardige, talig genuanseerde en lewenskragtige vorm van Afrikaans. Die ekonomiese potensiaal van Kaaps en die benutting daarvan as onderwys- en joernalistieke medium word ook bespreek.

A scholarly inquiry into disciplinary practices in educational institutions

aim of the book is to provide a scholarly and scientific perspective on the current state of discipline and disciplinary practices in schools and tertiary education settings. The issue of discipline is investigated from diverse paradigmatic and methodological perspectives, presenting empirical as well as also philosophical research. The empirical perspective includes quantitative (positivistic), qualitative (interpretive) and mixed methods (pragmatic), designs and worldviews. This book offers a ground-breaking contribution to the field of learner and student discipline, with insights into disciplinary practices and issues in educational institutions not hitherto researched, such as Technical Vocational Education and Training colleges and universities.
