Teaching Secondary Mathematics Alfred S. Posamentier 2002 The revision of this book introduces the 2000 NCTM Principles and Standards and explains their use for teaching secondary school mathematics instruction. Unlike other books, it utilizes 125 enrichment units to provide the staples in preparing to teach mathematics. The authors provide step-by-step techniques on preparing lessons and tests, motivating students, designing assignments, and organizing the classroom. This valuable book also provides practical teaching methods for immediate use along with answers to typical questions readers have about teaching math. Chapter topics include the mathematics teacher today, long-range and short range planning, teaching more effective lessons, the role of problem solving in the mathematics classroom, using technology to enhance mathematics instruction, authentic assessment and grading strategies, enriching mathematics instruction, and extracurricular activities in mathematics. For mathematics teachers in secondary schools.

Cultivating Math Confidence Kristen Smith 2026-07-01 This guidebook helps you tackle roadblocks your students may be facing in their math understanding and confidence. Author, teacher, and instructional coach Kristen Smith brings together dozens of classroom-tested planning and instructional strategies that have shown measurable improvements in student proficiency. Written in an easily replicable format, these practices demonstrate the direct connections between math instruction, student behavior, and student learning, and how making these connections with your students boosts proficiency. The book is divided into sections on planning, instruction, and coaching, addressing how teachers can use math content to both build student skills and drive student engagement and motivation, ultimately unlocking confident math learners. Chapters include examples and visuals like classroom photographs, sample materials, lesson plans, pacing guides, and coaching agendas. The author balances personal classroom anecdotes with student proficiency data collected across various educational settings, grade levels, and on all types of assessment. These markers include internal outcome-based assessments, state standardized tests, and performance tasks. Designed with both classroom-level and school or district usage in mind, this resource offers strategies that can be immediately implemented or used in evaluation and professional development. Teachers, administrators, instructional coaches, and pre-service teachers in secondary mathematics courses can all benefit from this practical primer on building math proficiency among their current and future students alike.
