Engineering Mathematics with Mathematica John S. Robertson 1995 This supplementary text for applied mathematics courses where Mathematica is used in a laboratory setting, is intended to be compatible with a broad range of engineering mathematics texts, as well as smaller, more specialized texts in differential equations and complex variables. It covers topics found in courses on ordinary and partial differential equations, vector analysis, and applied complex analysis. Students are guided through a series of laboratory exercises that present cogent applications of the mathematics and demonstrate the use of Mathematica as a computational tool to do the mathematics. Relevant applications along with discussions of the results obtained combine to stimulate innovative thinking from the students about additional concepts and applications.

Conform Glenn Beck 2014-05-06 Glenn Beck, the New York Times bestselling author of *The Great Reset*, considers the hot-button issue of education in the US, exposing the weaknesses of the Common Core school curriculum and examining why liberal solutions fail. Public education is never mentioned in the constitution. Why? Because our founders knew that it was an issue for state and local governments—not the federal one. It's not a coincidence that the more the federal government has inserted itself into public education over the years, the worse our kids have fared. Washington dangles millions of dollars in front of states and then tells them what they have to do to get it. It's backdoor nationalization of education—and it's leading us to ruin. In *Conform*, Glenn Beck presents a well-reasoned, fact-based analysis that proves it's not more money our schools need—it's a complete refocusing of their priorities and a total restructuring of their relationship with the federal government. In the process, he dismantles many of the common myths and talking points that are often heard by those who want to protect the status quo: Critics of the current system are just "teacher bashers"...Teachers' unions put kids first...Homeschooled kids suffer both academically and socially..."local control" is an excuse to protect mediocrity...Common Core is "rigorous" and "state led"...Critics of Common Core are just conspiracy theorists...Elementary school teachers need tenure...We can't reform schools until we eradicate poverty...school choice takes money away from public schools...Charter schools perform poorly relative to public schools. There is no issue more important to America's future than education. The fact that we've yielded control over it to powerful unions and ideologically driven elitists is inexcusable. We are failing ourselves, our children, and our country. *Conform* gives parents the facts they need to take back the debate and help usher in a new era of education built around the commonsense principles of choice, freedom, and accountability.
