Foundations of Maternal-Newborn and Women's Health Nursing Sharon Smith Murray, MSN, RN, C 2013-09-23 With easy-to-read coverage of nursing care for women and newborns, *Foundations of Maternal-Newborn & Women's Health Nursing*, 6th Edition shows how to provide safe, competent care in the clinical setting. Evidence-based guidelines and step-by-step instructions for assessments and interventions help you quickly master key skills and techniques. Also emphasized is the importance of understanding family, communication, culture, client teaching, and clinical decision making. Written by specialists in maternity nursing, Sharon Smith Murray and Emily Slone McKinney, this text reflects the latest QSEN competencies, and the accompanying Evolve website includes review questions to prepare you for the NCLEX® exam! Nursing Care Plans help you apply the nursing process to clinical situations. Procedure boxes provide clear instructions for performing common maternity skills, with rationales for each step. UNIQUE! Therapeutic Communications boxes present realistic nurse-patient dialogues, identifying communication techniques and showing to respond when encountering communication blocks. Communication Cues offer tips for interpreting patients' and families' verbal and nonverbal communication. Critical Thinking exercises focus on clinical situations designed to test your skills in prioritizing and critical thinking. Updated drug guides list important indications, adverse reactions, and nursing considerations for the most commonly used medications. Check Your Reading helps you assess your mastery of key content. Critical to Remember boxes highlight and summarize need-to-know information. Want to Know boxes provide guidelines for successful client education. Glossary provides definitions of all key terms. NEW! Safety Alerts help you develop competencies related to QSEN and safe nursing practice. NEW! Unfolding case studies help you apply what you've learned to practice. UPDATED Evidence-Based Practice boxes highlight the latest research and the most current QSEN (Quality and Safety Education for Nurses) practice guidelines for quality care. UPDATED content includes the late preterm infant, fetal heart rate pattern identification, obesity in the pregnant woman, and the QSEN competencies.

Birth Defects Surveillance Training World Health Organization 2016-05-31 The goal of this course is to provide participants with the foundational skills needed to begin the development implementation and ongoing improvement of a congenital anomalies surveillance programme in particular for countries with limited resources. It focuses on the methodology needed to develop either population-based or hospitalbased surveillance programmes. A set of congenital anomalies will be used as examples throughout this course. The specific examples used are typically severe enough that they would probably be captured within the first few days after birth have a significant public health impact and for some of them have the potential for primary prevention. Target audience This course is designed for individuals who are directly involved in the development implementation and daily activities related to congenital anomalies

surveillance programmes in their countries and who will directly teach others. Learning objectives By the end of this course participants will be able to: 1. describe how to use data for the development of prevention campaigns and policy/programme evaluation; 2. describe how to best present data to policy-makers; 3. identify selected major external congenital anomalies for monitoring; 4. describe the tools needed to ascertain and code congenital anomalies; 5. describe the processes for managing and analysing data; 6. demonstrate how to calculate the birth prevalence of congenital anomalies.
