Reading, Learning, Teaching Barbara Kingsolver

Paul Lee Thomas 2005 Our English classrooms are often only as vibrant as the literature that we teach. This book explores the writing of contemporary American author, Barbara Kingsolver, who offers readers and students engaging fiction, nonfiction, and poetry that confront the reader and the world. Here, teachers will find an introduction to the works of Kingsolver and an opportunity to explore how to bring those works into the classroom as a part of the reading and writing curriculum. This volume attempts to confront what we teach and how we teach as English teachers through the vivid texts Kingsolver offers her readers.

Moral Questions in the Classroom Katherine G. Simon 2001-01-01 In this study, Katherine Simon analyses the ways teachers address or avoid moral issues that arise in middle and high school classrooms, then explains how morally charged issues may be taught responsibly in a diverse democracy.

Literacy and Learning in the Content Areas

Sharon Kane 2017-07-05 The 3rd Edition of *Literacy & Learning in the Content Areas* helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature,

primary sources, biographies, essays, poetry, and online content, communities, and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.
