**Exploring Science and Belief** Michael Poole 2007-10 Some scientists have religious beliefs we must ourselves be prepared and willing to make a reasoned presentation of our faith, especially to young scientists, who have all too often concluded that a serious faith in a personal God and objective pursuit of scientific truth are incompatible. "Professor Francis Collins, Director, National Human Genome Research Institute " some do not the beliefs of most popular religions by scientific standards are based on evidence so flimsy that only an act of blind faith can make them acceptable. "Dr Francis Crick (co-discoverer of DNA s structure) " However, science and belief are both very important for us. Do we have to choose between them? The view that science and belief are in conflict is a major stumbling block for many people today. Michael Poole addresses this issue in "Exploring Science and Belief. " Is science the ultimate test of what to believe? Do its laws make belief in miracles impossible? Has Darwin s work ruled out the idea of a creating God? How did the universe develop? Was it accidental or planned? What will happen to it eventually? Do we have any significance in it? These are some of the questions addressed in "Exploring Science and Belief." Although he start(s) from what is for the theist the conviction, for the agnostic the hypothesis, and for the atheist the delusion that God exists, Michael Poole also dicusses evidence for God s existence. *Beyond All Belief* Peter Lemesurier 1983

*Facets of Faith and Science* Jitse Van Der Meer 1996-09-05 This first volume of Facets of Faith and Science explores the specific roles of metaphysical and religious beliefs in explanation and theory construction in the natural sciences. The contributors survey modes of interaction between religion and science with special attention for the sensitivities required for their historiography. Historical studies are used to construct models integrating religion and science, and reasons are offered why religion and science should or should not interact. Chapters Include: Religious Belief and the Natural Sciences: Mapping the Historical Landscape; Scientific Work and Its Theological Dimensions: Towards a Theology of Natural Science. Co-published with The Pascal Centre for Advanced Studies in Faith and Science.

*Belief and Science Teacher's Book* Joe Walker 2009-09-01 The Belief and Science Teacher's Book offers full teaching notes, worksheets and extension activities to support the comprehensive and full colour textbook it accompanies. The Belief and Science textbook follows the latest reviews and arrangements for National Qualifications, and can be used with students covering Belief and Science as a stand-alone unit, or by those following full RMPS courses. It includes differentiated tasks according to the three levels for which it caters, as well as sample assessment activities and a revision and study section at the back. This accompanying photocopiable workpack offers a wide range of extra activities that allow for consolidation of learning from the book and also for further differentiation, as well as being a valuable resource for Core RE classes in the middle to upper secondary school.

The Credibility of Science and Religion Paul Weingartner 2025-01-27 Weingartner compares criteria and basic assumptions for the credibility of scientific and religious belief systems. It is shown that mankind has access to basic knowledge about a higher spiritual power and knowledge by conscience about what is obligatory or forbidden. This is defended by further axiomatizations on basic terms as natural goods, natural and moral law, and conscience. Scientific and religious belief systems are then compared thoroughly and by logical deduction and verisimilitude. One main argument is that every kind of belief system has an upper and a lower bound of credibility, yet a degree of credibility that leads to the impossibility of rational justification for scientific belief systems must not be required from religious belief systems. Further topics are internal and external consistency, local refutation, mutual complementation between religion and theory of evolution as well as a comparison of the five world religions leading to general features of religion. It is shown that one main yet basic axiom of morality is the principle of charity. Finally, the book concludes with the credibility-requirements of science towards religion and those of religion towards science.
