Everyday Mathematics: Assessment handbook 2004

Mathematics Assessment Gerald Kulm 1994-10-28 This book provides math teachers and those who work with them with a comprehensive and practical resource for planning and implementing alternative assessment in the classroom. Drawing from his own experience working with teachers at several grade levels in a variety of settings, Gerald Kulm offers hands-on guidelines for assessing student understanding of procedures, concepts, and problem-solving, including advice on developing and interpreting assessment tasks, assessing individual and group mathematical activities, using scoring rubrics, developing student portfolios, and more. |Kulm provides specific tips and ideas for getting started and simple ways to adapt math activities and problems for assessment. He includes numerous examples of student products such as puzzles, projects, problems, interviews, and group activities that can allow for individual differences in learning and productivity. |Kulm also offers a section of frank teacher-written summaries that provide firsthand insights into what worked and what did not. The range of types of classes and assessment goals described in these summaries make it easy for nearly any teacher to find a situation similar to that of their own class and adapt the strategies that were successful.

Using Developmentally Appropriate Practices to Teach the Common Core: Grades PreK-3 provides current and prospective primary grade teachers with an understanding of the CCSS-ELA and CCSS-M that highlights their compatibility with developmentally appropriate practices (DAP), the instructional approach

generally preferred by teachers of young children. The book begins by framing the CCSS as a distinct improvement over lengthy lists of academic content standards and as a carefully conceptualized and DAP-friendly set of curriculum guidelines. Next, the CCSS-ELA and CCSS-M for Grades K-3 are unpacked, analyzed, synthesized, and cross-referenced to key features of DAP. Finally, several "hot topic" issues—differentiating instruction to meet the needs of all learners, ensuring equitable access to the curriculum for English Language Learners, addressing assessment and accountability expectations, and educating parents and families about the CCSS and DAP—are prioritized and examined in depth. Using Developmentally Appropriate Practices to Teach the Common Core: Grades PreK-3 is a highly useful guide for both pre-service and in-service early childhood education teachers.

Results and Interpretations of the 2003 Mathematics Assessment of the National Assessment of Educational Progress Peter Kloosterman 2007 With the enactment of No Child Left Behind, and its sanctions for schools that fail to make adequate yearly progress, NAEP (National Assessment of Educational Progress) results are no longer afterthoughts. Instead, the results generate headlines and are at the forefront of discussion of what is working in schools and what needs to be changed. As the scrutiny of NAEP results has increased, the National Center for Education Statistics has provided more detailed reporting of the results and has increased the level of security of the assessment items. Both the level of detail and the concern for item security have played prominent roles in the development of this book. The foregoing changes make understanding NAEP and its consequences crucial for any educator. This book provides a background on NAEP, looks at 2003 mathematics achievement in different content areas, discusses data on who is teaching mathematics in the United States and examines students' perception of mathematics. Additionally, the book deals with results from NAEP broken down by race/ethnicity and by gender, analyses certain NAEP results with a focus on what is actually measured by those results and examines changes in NAEP over the years and what those changes mean for NAEP as a tool for understanding student learning.
