Math and Science for Young Children Rosalind Charlesworth 1990 *Math and Science for Young Children, 4E* focuses on the integration of mathematics and science with the other content areas for children from birth through age eight. Based on theories of child development and learning, the book is compatible with the guidelines and standards of major national professional organizations. Mathematics and science concepts are related to national standards and present a common framework for inclusion with music and movement, language arts, visual arts, science and social studies activities. Developmentally appropriate instructional and assessment practice is stressed, and each concept unit includes assessment, instructional, and evaluation strategies. Technology and Web resources are also provided.

I Do We Do You Do Math Problem Solving Grades 1-5 Perfect Sherri Dobbs Santos 2011-07-18 *I DO - WE DO - YOU DO: An RTI Intervention for Math Problem Solving (Grades 1-5)* is a ready-made intervention based on best practices and current research for students struggling with the underlying thought processes and step-by-step procedures of math problem solving. Each section includes a Universal Screening, data point assessments, and intervention cards which can be copied and used with individual students or small groups of students. The 'I DO-WE DO-

YOU DO' intervention takes the guess work out of how to intervene with students at-risk of failure and provides teachers with the tools necessary to meet their individual needs. A total of 36 problem solving cards are included for each grade 1-5 and follow three simple steps: 1) Teacher models, 2) Teacher/student work collaboratively, and 3) Student completes independently. Detailed directions, progress monitoring graphs, and a scoring rubric are included, making the analysis of data easy to record and understand. Also available in spiral bound at lulu.com.

Early Childhood Math Routines Antonia Cameron 2020 "This book begins by pushing back on the kind of rote routines that lack opportunities for reasoning (like the calendar) that teachers often use in early childhood and primary classrooms. Instead, the author offers innovations on old routines and some new routines that encourage reasoning, argumentation, and the development of important math ideas. She focuses on using math routines in playful ways with your children. See chapter titles for the different routines featured in the book"--
