Computer Modeling in the Aerospace Industry Iftikhar B. Abbasov 2019-11-21 Devoted to advances in the field of computer simulation of aerospace equipment, this study is the most up-to-date coverage of the state-of-the-art on coastal and passenger aircraft, drones, and other recent developments in this constantly changing field. This book is devoted to unique developments in the field of computer modeling in aerospace engineering. The book describes the original conceptual models of amphibious aircraft, ground-effect vehicles, hydrofoil vessels, and others, from theory to the full implementation in industrial applications. The developed models are presented with the design of passenger compartments and are actually ready for implementation in the aircraft industry. The originality of the concepts are based on biological prototypes, which are ergonomic, multifunctional and aesthetically pleasing. The aerodynamic layout of prospective convertible land and ship-based aircrafts of vertical and short takeoff-landing is presented, as well as the development of the original model of the unmanned aerial vehicle, or drone. The results of full-scale experiments are presented, including the technology of modeling aerospace simulators based on the virtual reality environment with technical vision devices. Whether for the practicing engineer in the field, the engineering student, or the scientist interested in new aerospace developments, this volume is a must-have. This groundbreaking new volume: Presents unique developments of coastal aircraft concepts based on biological prototypes, from the idea to the finished model Gives the process of modeling the original unmanned aerial vehicle Investigates aerospace simulators based on virtual reality environment with technical vision devices Covers the original ideas of creating carrier-based aviation for sea ships and the results of field experiments simulating an unmanned aerial vehicle Provides many useful illustrations of naval aviation Audience: The book is intended for aerospace engineers, mechanical engineers, structural engineers, researchers and developers in the field of aerospace industry, for aircraft designers and engineering students. It will be useful for scientists, students, graduate students and engineers in the field of naval aviation and space simulators.

Innovations in Technologies: Pioneering Sustainable Infrastructure for a Resilient Future Bhalchandra V. Khode 2025-04-28 This book

harmoniously unites diverse cosmic perspectives, nurturing a collective understanding of current trends and cosmic challenges. In the book realm of engineering symphonies, the "International Conference on Recent Trends in Infrastructural Development and Sustainable Materials (IC-RTIDSM-2023)" stood tall as a grand compilation of ingenious research. Curated by the visionary Department of Civil Engineering at G H Rasoni College of Engineering, Nagpur, this symposium danced into existence on the 25th and 26th of November 2023, a celestial stage for academia, business professionals, and aspiring engineers to unite in an ethereal exchange of creativity and knowledge. In pursuit of sustainable dreams, the conference ensemble aspired to unravel the secrets of eco-conscious materials and resilient infrastructure. The grand publication titled "International Conference on Recent Trends in Infrastructural Development and Sustainable Materials" adorned the illustrious pages of the esteemed Sustainable Civil Infrastructures book series indexed by Scopus. The grand stage of IC-RTIDSM-2023 sought to integrate the dazzling constellations of ongoing research and innovation from every corner of the globe. United under the cosmic banner of progress, luminaries, practitioners, and researchers merged their brilliance to orchestrate a celestial symphony of knowledge sharing and harmonious collaboration. This celestial chronicle, born from the harmonies of IC-RTIDSM-2023, emerges as a guiding star, illuminating the path of civil engineering's future. In the grand crescendo of its cosmic symphony, the International Conference on Recent Trends in Infrastructural Development and Sustainable Materials (IC-RTIDSM-2023) marks a celestial chapter of knowledge and cosmic cooperation in the realm of civil engineering. The celestial masterpiece borne from this cosmic gathering serves as a guiding star, illuminating the celestial paths of research, policy, and action toward resilient and sustainable civil infrastructures. Like a celestial conductor, it propels humanity forward, orchestrating a celestial ode to the present and future, resounding with the melody of a better tomorrow.
