The world of big data, precision medicine, genomics, and telehealth require us to break old paradigms of architecture and functionality while not interrupting existing care processes and revenue cycles... We're dealing with state sponsored cyberterrorism, hacktivism, and organized crime. I describe healthcare IT security as a cold war... You'll hear from the experts who created many of the regulations and best practices we're using today to keep information private. I hope you enjoy this book as much as I have and that it finds a place of importance on your book shelf." From the Foreword by John D. Halamka, MD, Chief Information Officer, CAREGROUP, Boston, MA
