Biology Neil A. Campbell 2005
Neil Campbell and Jane Reece's BIOLOGY remains unsurpassed as the most successful majors biology textbook in the world. This text has invited more than 4 million students into the study of this dynamic and essential discipline. The authors have restructured each chapter around a conceptual framework of five or six big ideas. An Overview draws students in and sets the stage for the rest of the chapter, each numbered Concept Head announces the beginning of a new concept, and Concept Check questions at the end of each chapter encourage students to assess their mastery of a given concept. & New Inquiry Figures focus students on the experimental process, and new Research Method Figures illustrate important techniques in

biology. Each chapter ends with a Scientific Inquiry Question that asks students to apply scientific investigation skills to the content of the chapter.

Keys to Success Carol Carter 2005 [This book] has set the standard for helping readers understand how to be successful in College, Career, and Life. This revision builds on this strength, while adding the new dimension of successful intelligence. Through building their ability to think analytically, creatively, and practically, readers can understand their own power to choose and to act as they proceed through life and the world of work. Because this book shows readers how what helps them succeed in college will also serve them on the job and in life, [it] appeals to every age (traditional and older) and stage (full-time, part-time, working, parenting) of reader.

All new stories have been introduced to address the current challenges today's student faces -- e.g., values, goal setting, time management, basic stress management, test taking strategies, balancing school with work, returning to school as an older student, dealing with financial needs, parenting, supporting various lifestyles and schedules, etc. Learning Styles coverage shows a clearer delineation of the two learning styles assessments and makes them more useful: how you learn (Gardner's Multiple-Intelligences-based assessment) and how you interact with others (Myers-Briggs-based assessment). Provides specific strategies to play to strengths, compensate for weaknesses, and build study skills.-
