## **Army and Navy Register** 1918

*Walford's Guide to Reference Material* Albert John Walford 1994 Volume 2 of this guide contains descriptions of 8300 plus critically evaluated & recommended reference resources available in all formats. Organized by Universal Dewey Classification, the topics covered are those usually found in the 100s--Philosophy & Psychology, 200s--Religion, 300s--Social Sciences, & the 900s--Geography, Biography & History. This volume particularly reflects the proliferation of travel & tourist guides, & reference works on Eastern Europe & Central Asia following the collapse of communism. Over the last few years an enormous expansion has also been noted of reference works in both religion & philosophy. Volume 1 covers Science

& Technology. Volume 3 covers Generalia, Languages & Literature, & the Arts.

## **The Literary Guide and Rationlist Review** 1925

*Reference Services in the Humanities* Judy Reynolds 1994-11-11 This helpful book provides practical insight into the work and environment of reference services in the humanities. Librarian's mental maps of humanities reference materials must include an awareness of the metaphoric, not too precise nature of many patrons' queries. Reference Services in the Humanities discusses the structure of literature in the humanities and how it matches or challenges mental images of the field. Chapters are infused with the issues of language, names,

and meaning within a metaphoric genre. The book serves as a guide to humanist's use of metaphoric language and also as a bibliography of sources. Reference Services in the Humanities contains specific references for finding materials in areas that are not traditional, mainstream arts. This sample of disciplines provides case studies depicting each field's particular idiosyncrasies. Chapters examine the challenge of referral reference and common problems encountered in searching for answers to patrons' questions. The book contains a theoretical framework for interacting with patrons and addresses options for humanities reference in an electronic age. This book brings together librarians and researchers who provide and manage reference services to a wide array of disciplines within the humanities. Authors come from all types of libraries and represent a broad spectrum of patrons, from the young student curious about the movies to practicing musicians and craftspersons. This diversity

provides an informative grounding for practitioners and library school students and faculty who wish to become effective reference librarians in the future. Reference Services in the Humanities is divided into four sections which address research questions and challenges in selected disciplines, descriptions from the field, political issues in the humanities, and theories and ideas for the future. Specific topics explored include access to special collections, censorship, library resources for theater artists, history research, vocabulary control, labeling of minorities, craft information sources, and much more.

**Walford's Guide to Reference Material: Social and historical sciences, philosophy and religion** Albert John Walford 1999 A

revised and updated guide to reference material. It contains selective and evaluative entries to guide the enquirer to the best source of reference in each subject area, be it journal article, CD-ROM, on-line database, bibliography, encyclopaedia, monograph or directory. It features full critical annotations and reviewers' comments and comprehensive author-title and subject indexes. The contents include: philosophy and psychology; religion; social sciences, sociology, statistics, politics, economics, labour and employment; land and

property, business organizations, finance and banking, and economic surveys; economic policies and controls, trade and commerce, business and management, and law; public administration, social services and welfare, education, customs and traditions; geography; biography; and history.

[Guide to the Battle of Antietam, the Maryland Campaign of 1862](#) Jay Luvaas 1996 "America's bloodiest day"—the Battle of Antietam on September 17, 1862—left more dead American soldiers in its wake than any other 24-hour period in history. Antietam and the related battles of the Maryland Campaign that led up to the lethal confrontation did not result in decisive defeats for either side. But they did serve as a brutal warning to an out-gunned, out-commanded, and out-organized Union army. Eyewitness accounts by battle participants make these guides an invaluable resource for travelers and nontravelers who want a greater understanding of five of the most devastating yet

influential years in our nation's history. Explicit directions to points of interest and maps—illustrating the action and showing the detail of troop position, roads, rivers, elevations, and tree lines as they were 130 years ago—help bring the battles to life. In the field, these guides can be used to recreate each battle's setting and proportions, giving the reader a sense of the tension and fear each soldier must have felt as he faced his enemy.

**Garden Guide** John Harrison Dick 1918  
American Reference Books Annual Juneal M. Chenoweth 1995-04-15 With more than 1600 descriptive and evaluative entries, ARBA continues its 26-year tradition as a comprehensive review source for reference works published or distributed in the US. ARBA 95 encompasses the subject spectrum, covering such broad areas as general reference, history, education, economics and business and science and technology. Of special note in this edition is increased coverage of CD-ROM products. More

than 350 reviewers provide reviews that cover strengths and weaknesses of the reference works.

**Legal Information Buyer's Guide and Reference Manual 2005** Kendall F. Svengalis 2005-06-15

**Reference and Information Services** Kay Ann Cassell 2023-01-17 From the ongoing flood of misinformation to the swift changes occasioned by the pandemic, a myriad of factors is spurring our profession to rethink reference services. Luckily, this classic text is back in a newly overhauled edition that thoughtfully addresses the evolving reference landscape. Designed to complement every introductory library reference course, Cassell and Hiremath's book also serves as the perfect resource to guide current practitioners in their day-to-day work. It teaches failsafe methods for identifying important materials by matching specific types of questions to the best available sources, regardless of format. Guided by a national advisory board of

educators and experts, this thoroughly updated text presents chapters covering fundamental concepts, major reference sources, and special topics while also offering fresh insights on timely issues, including a basic template for the skills required and expectations demanded of the reference librarian; the pandemic's effect on reference services and how the ingenuity employed by libraries in providing remote and virtual reference is here to stay; a new chapter dedicated to health information, with a special focus on health equity and information sources; selecting and evaluating reference materials, with strategies for keeping up to date; a heightened emphasis on techniques for evaluating sources for misinformation and ways to give library users the tools to discern facts vs. "fake facts"; reference as programming, readers' advisory services, developmentally appropriate material for children and young adults, and information literacy; evidence-based guidance on handling microaggressions in reference

interactions, featuring discussions of cultural humility and competence alongside recommended resources on implicit bias; managing, assessing, and improving reference services; and the future of information and reference services, encapsulating existing models, materials, and services to project possible evolutions in the dynamic world of reference

2013-06-29 Psychoanalysis and information science are two disciplines that twenty years ago hardly anyone would have considered closely related with regard either to persons or subject matter. The cooperation between the two fields was made possible, on the one hand, by the development of information science from a technological discipline to a theoretically

founded scientific discipline, and on the other, by the development of psychoanalysis from a hermetically closed special discipline to an open and empirical science. This study reports the successful inclusion of information science as an instrument of research on the psychoanalytic process. This direction of work was initiated by Donald Spence and Hartvig Dahl from the Research Institute of Mental Health, New York, at the end of the 1960s. H. Thom~, H. K~che1e, and their research group in Ulm must be credited with having adopted Spence's programs as early as 1974; at that time the programs even had to be implemented far away on the IBM computer at the University of Heidelberg. The efforts to expand computer-aided content analysis to a method for process research led in 1975 to the acquisition of the Hamburg program for Electronic Verbal Analysis (EVA). In the following years the author of this study revised, extended, and supplemented the EVA to create the U1m version. This book now

describes another step in the integration of information technology in fundamental research in psychoanalysis.

*A Reference Guide for English Studies* Michael J. Marcuse 1990-01-01 This ambitious undertaking is designed to acquaint students, teachers, and researchers with reference sources in any branch of English studies, which Marcuse defines as "all those subjects and lines of critical and scholarly inquiry presently pursued by members of university departments of English language and literature." Within each of 24 major sections, Marcuse lists and annotates bibliographies, guides, reviews of research, encyclopedias, dictionaries, journals, and reference histories. The annotations and various indexes are models of clarity and usefulness, and cross references are liberally supplied where appropriate. Although cost-conscious librarians will probably consider the several other excellent literary bibliographies in print, such as James L. Harner's *Literary Research Guide*

(Modern Language Assn. of America, 1989), larger academic libraries will want Marcuse's volume.-- Jack Bales, Mary Washington Coll. Lib., Fredericksburg, Va. -Library Journal. Garden Guide Alpheus T. De La Mare 1921
