Automotive Software Architectures Mirosław Staron 2021-03-01 This book introduces the concept of software architecture as one of the cornerstones of software in modern cars. Following a historical overview of the evolution of software in modern cars and a discussion of the main challenges driving that evolution, Chapter 2 describes the main architectural styles of automotive software and their use in cars' software. Chapter 3 details this further by presenting two modern architectural styles, i.e. centralized and federated software architectures. In Chapter 4, readers will find a description of the software development processes used to develop software on the car manufacturers' side. Chapter 5 then introduces AUTOSAR - an important standard in automotive software. Chapter 6 goes beyond simple architecture and describes the detailed design process for automotive software using Simulink, helping readers to understand how detailed design links to high-level design. The new chapter 7 reports on how machine learning is exploited in automotive software e.g. for image recognition and how both on-board and off-board learning are applied. Next, Chapter 8 presents a method for assessing the quality of the architecture - ATAM (Architecture Trade-off Analysis Method) - and provides a sample assessment, while Chapter 9 presents an alternative way of assessing the architecture, namely by using quantitative measures and indicators. Subsequently Chapter 10 dives deeper into one of the specific properties discussed in Chapter 8 - safety - and details an important standard in that area, the ISO/IEC 26262 norm. Lastly, Chapter 11 presents a set of future trends that are currently emerging and have the potential to shape automotive software engineering in the coming years. This book explores the concept of software architecture for modern cars and is intended for both beginning and advanced software designers. It mainly aims at two different groups of audience - professionals working with automotive software who need to understand concepts related to automotive architectures, and students of software engineering or related fields who need to understand the specifics of automotive software to be able to construct cars or their components. Accordingly, the book also contains a wealth of real-world examples illustrating the concepts discussed and requires no prior background in the automotive domain. Compared to the first edition, besides the two new chapters 3 and 7 there are considerable updates in chapters 5 and 8 especially.

Access to Power Ijlal Naqvi 2022-09-16 One of Pakistan's largest problems is its inability to produce enough electricity. In *Access to Power*, Ijlal Naqvi explores state capacity in Pakistan by following the material infrastructure of electricity across the provinces and down into cities and homes. He argues that the national challenges of budgetary constraints and power shortages directly result from conscious strategic decisions that are integral to Pakistan's infrastructural state. Looking through the lens of the electrical power sector, this book reveals how Pakistan actually functions and to whose benefit.

Experimentation Matters Stefan H. Thomke 2003-08-05 Every company's ability to innovate depends on a process of experimentation whereby new products and services are created and existing ones improved. But the cost of experimentation is limiting. New technologies--including

computer modeling and simulation--promise to lift that constraint by changing the economics of experimentation. They amplify the impact of learning, creating the potential for higher R&D performance and innovation and new ways of creating value for customers. Stefan H. Thomke argues that to unlock such potential, companies must not only understand the power of new technologies for experimentation, but also fundamentally change their processes, organization, and management of innovation. He shows why experimentation is so critical to innovation, explains the impact of new technologies, and outlines what managers must do to integrate them successfully.
