Connected Consumer and the Future of Financial Services Patrick Molineux

2012-08-07 Whether you pay the bills or issue them, financial services are changing. From banking to insurance to investments, financial services are being transformed by consumers who are connecting to the Internet in unprecedented numbers globally, driving 4 trends: Mobile-Mobile phones, tablets and cards are revolutionizing

payments and financial processes such as insurance claims. Mobile money, notably in Africa, is a driving force. Mining-Enterprises and consumers can mine the vast troves of structured and unstructured data for financial insights. Data can completely redefine risk. Financial services firms must explore the connected consumer for their business. Consumers must understand how financial services are changing and their role in that change.

You need this book because, fortunately, you do have recourse.....
