## **Queer and Deleuzian Temporalities** Rachel Loewen Walker

2021-11-18 Rachel Loewen Walker's original study of Deleuze's theory of temporality advances a concept of the living present as a critical juncture through which novel meanings and activism take flight in relation to new feminist materialisms, queer theory, Indigenous studies, and studies of climate. Drawing on literature, philosophy, popular culture, and community research, Loewen Walker unsettles the fierce linearity of our stories, particularly as they uphold fixed systems of gender, sexuality, and identity. Treading new ground for Deleuzian studies, this book focuses on the non-linearity of the living present to show that everything is within rather than outside of time. Through this critical re-evaluation, which takes in climate change, queer and trans politics, and Indigenous sovereignty, *Queer and Deleuzian Temporalities* "thickens" the present moment. By opening up multiple pasts and multiple futures we are invited to act with a deepened level of accountability to all possible timelines.

## **The Southern Journal of Philosophy** 2007

*Deleuze and Science* John Marks 2006 This collection brings together essays on Deleuze and Guattari's treatment of science in *A Thousand Plateaus* and *What is Philosophy?*, as well as looking in detail at scientific issues such as emergence, complexity theory and non-linear dynamics.

## **The Philosophical Review** Jacob Gould Schurman 2004

*Deleuzian Fabulation and the Scars of History* Ronald Bogue 2010 Fabulation, he argues, entails becoming-other, experimenting on the real, legending, and inventing a people to come, as well as an understanding of time informed by Deleuze's Chronos/Aion distinction and his theory of the three passive syntheses of time. In close readings of contemporary novels by Zakes Mda, Arundhati Roy, Roberto Bolano, Assia Djebar and Richard Flanagan, Bogue demonstrates the usefulness

of fabulation as a critical tool, while exploring the problematic relationship between history and story-telling which all five novelists adopt as a central thematic concern. The time of fabulation in these novels is shown to be a time shaped by a complex interplay of succession and simultaneity, amnesia and anamnesis, trauma and transformation. -- Book Jacket.

## **Deleuze's Difference and Repetition** Joe Hughes 2009

*Art Theory* Robert Williams 2009-03-09 ART THEORY ART THEORY "[Art Theory] is a first-class introduction to the subject, revealing an unusual historical range, a command of diverse and often difficult ideas, and a natural flair for seeing the point - of art and of theory... Robert Williams has written a book I will keep on my shelf for rereading and I look forward to further works by him." John Haldane in *The Art Book* *Art Theory, Second Edition* is a unique survey of Western thought about art from ancient times to today. This lucid and lively narrative, geared to the needs of the general reader and beginning students, consists of six chapters covering the major periods of Western art history: Antiquity and the Middle Ages, the early modern period (Renaissance and Baroque), the Enlightenment, the nineteenth century, early twentieth-century modernism, and postmodernism. This new edition expands the original to include more in-depth coverage of contemporary art. Wide-ranging and exceptionally balanced in its analysis, *Art Theory* relates theory to the practice as well as to the intellectual and cultural-historical currents of each period. This new edition is an indispensable read for students and art lovers alike.

## **Aspects of the Minor** Greg Miller 2004

*Applied Geography for the Entrepreneurial University* Antoine Bailly 2008 "Declines in public support for universities throughout the world have prompted administrators and policy makers to seek alternative funding. One favored idea is the entrepreneurial university - one that

uses modern business practices including commercializing its intellectual property. A related notion is the entrepreneurial professor, who is willing to explore next commercial markets for his or her intellectual outputs." "Although these concepts for commercialization and partnerships with business and government are not always appreciated or embraced, they are becoming more common, particularly in the natural sciences, engineering, and medicine. This book focuses on the field of geography and its potential in the entrepreneurial university. The contributors also discuss how to encourage the acceptance of entrepreneurial faculty who move the work of academic geography into the world of commercial applications in industry, government, and nongovernmental sectors."--BOOK JACKET.

*Thousand Plateaus and Philosophy* Henry Somers-Hall 2017-12-20 "This volume brings together a team of international specialists on Deleuze and Guattari to provide in-depth critical studies of each plateau of their major work, *A Thousand Plateaus*. It combines an overview of the text with deep scholarship and brings a renewed focus on the philosophical significance of their project. 'A Thousand Plateaus' represents a whole new way of doing philosophy. This collection supports the critical reception of Deleuze and Guattari's text as one of the most important and influential works of modern theory. Key Features : emphasises the philosophical nature of *A Thousand Plateaus*, provides detailed coverage of the text as a whole, brings together cutting edge research from some of the leading lights in scholarship on Deleuze and Guattari, an ideal companion to a plateau-by-plateau reading of Deleuze and Guattari's work."--Back cover

*Order and the Virtual* Bill Ross 2024-06-30 Bill Ross demonstrates the relation between Gilles Deleuze's philosophy of difference and the conceptual foundations of contemporary physics through careful engagements with the theory of relativity, quantum physics and chaos and complexity theory. Ross shows that recent work in cosmology by figures such as Lee Smolin and David Bohm calls into question the assumption that the laws of physics are universal and unchanging, a view that Deleuze anticipates. The second law of thermodynamics tells us that

order in the universe as a whole is destined to break down. Against this, Ross demonstrates that, given Deleuze's conception of the event as an expression of non-locality, and his emphasis on dissymmetry over symmetry, at the cosmological scale the universe is not destined towards disorder: evolution outruns entropy.

**Deleuze and Philosophy** Constantin V. Boundas 2006 Explores the philosophical relevance of Gilles Deleuze. This collection of essays uses Deleuze to move between thinkers such as Plato, Aristotle, Husserl, Hume, Locke, Kant, Foucault, Badiou and Agamben. It is suitable for those interested not just in Deleuze but in the history of philosophical ideas.

**The Becoming of Bodies** Rebecca Coleman 2009-08-15 Thinking through original empirical research, this book explores the relations between girls' bodies and images from a Deleuzian perspective. Holding in suspension models of cause-and-effect and of subject(ivity)/object(ivity) it asks, what do images make possible for the becoming of bodies?

**Stanley Cavell and Philosophy as Translation** Paul Standish 2017-02-28 Translation exposes aspects of language that can easily be ignored, renewing the sense of the proximity and inseparability of language and thought. The ancient quarrel between philosophy and literature was an early expression of a self-understanding of philosophy that has, in some quarters at least, survived the centuries. This book explores the idea of translation as a philosophical theme and as an important feature of philosophy and practical life, especially in relation to the work of Stanley Cavell. The essays in this volume explore philosophical questions about translation, especially in the light of the work of Stanley Cavell. They take the questions raised by translation to be of key importance not only for philosophical thinking but for our lives as a whole. Thoreau's enigmatic remark "The truth is translated" reveals that apparently technical matters of translation extend through human lives to remarkable effect, conditioning the ways in which the world comes to light. The experience of the translator exemplifies the challenge of judgement where governing rules and principles are

incommensurable; and it shows something of the ways in which words come to us, opening new possibilities of thought. This book puts Cavell's rich exploration of these matters into conversation with traditions of pragmatism and European thought. Translation, then, far from a merely technical matter, is at work in human being, and it is the means of humanisation. The book brings together philosophers and translators with common interests in Cavell and in the questions of language at the heart of his work.

### **Gilles Deleuze's Difference and Repetition** James Williams

2013-01-31 A new edition of this introduction to Deleuze's seminal work, *Difference and Repetition*, with new material on intensity, science and action and new engagements with Bryant, Sauvagnargues, Smith, Somers-Hall and de Beistegui.

**Gilles Deleuze's Philosophy of Time** James Williams 2011-02-23 This book provides an overall interpretation of Deleuze's philosophy alongside a critical introduction to one of the most important unifying ideas in his work: the construction of new and important philosophies of time.

*The Neuro-Image* Patricia Pisters 2012-07-11 Arguing that today's viewers move through a character's brain instead of looking through his or her eyes or mental landscape, this book approaches twenty-first-century globalized cinema through the concept of the "neuro-image." Pisters explains why this concept has emerged now, and she elaborates its threefold nature through research from three domains—Deleuzian (schizoanalytic) philosophy, digital networked screen culture, and neuroscientific research. These domains return in the book's tripartite structure. Part One, on the brain as "neuroscreen," suggests rich connections between film theory, mental illness, and cognitive neuroscience. Part Two explores neuro-images from a philosophical perspective, paying close attention to their ontological, epistemological, and aesthetic dimensions. Political and ethical aspects of the neuro-

image are discussed in Part Three. Topics covered along the way include the omnipresence of surveillance, the blurring of the false and the real and the affective powers of the neo-baroque, and the use of neuro-images in politics, historical memory, and war.

**Deleuze and Contemporary Art** Stephen Zepke 2010 *Deleuze and Contemporary Art* maps the relations and resonances between the important and influential twentieth-century French philosophers Gilles Deleuze and Félix Guattari and contemporary art practice.
