PROCEEDINGS OF INTERNATIONAL CONFERENCE ON COMPUTER SCIENCE AND COMMUNICATION ENGINEERING Dr. Arimanda Vara Prasad Reddy It is with great pride and enthusiasm that we present the proceedings of the First International Conference on Computer Science and Communication Engineering, organized by Holy Mary Institute of Technology and Science, Hyderabad. This conference marks a significant milestone in our commitment to advancing innovation, research, and collaboration in the ever-evolving domains of computer science and communication technologies. In an era where digital transformation is rapidly redefining the global landscape, fields

such as Artificial Intelligence (AI) and Machine Learning (ML) have emerged as powerful drivers of sustainable progress. From smart energy systems and intelligent healthcare solutions to advancements in agriculture and environmental conservation, these technologies offer immense potential to address the critical challenges of our time. This conference has provided a vibrant platform for researchers, academicians, industry leaders, and students from across the globe to come together, share knowledge, and explore novel applications of AI, ML, and communication engineering aimed at sustainable development. The overwhelming response and the diversity of contributions reflect the growing significance and global interest in these areas. The range of topics featured in this volume showcases not only the depth of academic and practical research but also the spirit of innovation and collaboration that underpins this conference. Each paper represents a step forward in our shared pursuit of technological solutions for a better, more sustainable world. We extend our sincere gratitude to all the keynote speakers, session chairs, reviewers, authors, and participants for their valuable contributions. A special word of thanks goes to the organizing committee, sponsors, and dedicated volunteers, whose tireless efforts have made this event a resounding success. As you explore the proceedings, we hope that the ideas and collaborations born from this conference will continue to inspire impactful research and foster long-term partnerships for a future that is both technologically advanced and environmentally responsible. Organizing Committee, ICCSCE 2025 **Management Information Systems** Kenneth C. Laudon 1994 **Green Communications and Networks** Chenguang Yang 2012-01-05 The objective of GCN 2011 is to facilitate an exchange of information on best practices for the latest research advances in the area of green communications and networks, which mainly includes the intelligent control, or efficient management, or optimal design of access network

infrastructures, home networks, terminal equipment, and etc. Topics of interests include network design methodology, enabling technologies, network components and devices, applications, others and emerging new topics.

An Introduction to Systems Analysis Techniques Mark Lejk 1998 This book has been written by two lecturers who have been teaching systems analysis techniques to students for a number of years. Not only have they been active practitioners with first hand knowledge of the techniques described, but have also developed effective ways of getting their message across to students from a wide variety of backgrounds. The book is based on the way they teach, and comes across in an easy, friendly and accessible style. It lays a firm foundation in analysis and is suitable for a wide range of undergraduate courses. The techniques introduced include spray and tree diagrams, data flow diagrams, data modelling, normalisation and entity life histories. The approach throughout is to introduce the techniques by the use of step-by-step worked examples.

Software Project Management Bob Hughes 2002 From its first appearance in 1995, this book has been consistently well received by tutors and students alike. Now with a revised and updated 3rd edition the authors have updated the original text to better reflect the latest developments in Software Project Management.

Essentials of Management Information Systems Kenneth C. Laudon 2003 Appropriate for both undergraduate and MBA students, this textbook examines the role of information systems in business and management. The authors describe the organizational and technical foundations of information systems, decision support systems, and the

process of redesigning an organization. The fifth edition is reorganized to focus on the use of the internet to digitally enable business processes.
