2018-12-21 This book brings together multiple critical assessments of the current state and future visions of global development studies. It examines how the field engages with new paradigms and narratives, methodologies and scientific impact, and perspectives from the Global South. The authors focus on social and democratic transformation, inclusive development and global environmental issues, and implications for research practices. Leading academics provide an excellent overview of recent insights for post-graduate students and scholars in these research areas.

Development Fieldwork Regina Scheyvens 2014-02-17 This book provides an invaluable guide to undertaking development fieldwork in both the developing world and in western contexts. It takes you through all the key stages in development research and covers: Research design and the roles of quantitative and qualitative methods. Research using archival, textual and virtual data, along with using the internet ethically. Practical as well as personal issues, including funding, permissions, motivation and attitude. Culture shock, ethical considerations and working with marginalized, vulnerable or privileged groups, from indigenous peoples through to elites and corporations. How to write up your findings. Sensitive, engaging and accessible in tone, the text is rich in learning features; from boxed examples to bullet-pointed summaries and questions for reflection. *Development Fieldwork* is the perfect companion for students engaged in research across development studies, geography, social anthropology or public policy.

Methods in Development Research Jeremy Holland 2005 Over the past decade there has been an increasingly receptive audience for participatory and qualitative research methods by policy makers, development practitioners and academics working in applied research. At the same time there is an increasing awareness that the value of research can be enhanced through a more systematic combination of quantitative and qualitative methods. While this recent interest has begun to provide useful pointers as to how development research might be improved, it has also given rise to certain problems. This book will draw together lessons about emerging best practice with regard to combining qualitative and quantitative methods and approaches to generate numbers from qualitative/participatory methods and to monitor and evaluate development processes. It will build and expand upon innovation and reflection from practice in developing and developed societies, from within development agencies and academia, government departments and civil society organizations. By drawing on current research in many sectors and countries, the book will situate current development research issues squarely within debates about development policy and social research and it will help begin the process of defining best practice in the use of participatory/ qualitative and quantitative methods, and issues of methodological triangulation which are of considerable interest to academics, practitioners and policy makers. A genuine how to manual which combines best practice and new innovations and presents fascinating material for academics, practitioners and policy makers.
