*Global Migration and Diversity of Educational Experiences in the Global South and North*

Shoba Arun 2023-03-31 This book presents a child-centred approach to migrant children's experiences in education. Using a decolonising framework, the book interrogates the diversity of migrant experiences in the global South and North. The book brings together researchers and practitioners from education, childhood studies, sociology, and linguistics to debate and theorise key methodological and empirical issues in migrant children's experiences through education. It focuses on how diverse forms of global mobilities are key to transforming educational experiences of children and considers the interplay of class, race, gender, geography, and learning settings. By doing so, the book uncovers particular challenges for addressing sustainable development goals relating to education and inclusive development. Diversifying the study of migration and development, the book challenges the Eurocentrism of the discipline and contributes to ongoing efforts to liberate the field from labels and discourses that further marginalise migrant children. Using an intersectional and decolonising approach to address an important gap in the diversity of migrant experiences, the book will be of great interest to researchers, scholars, and students in the field of migration studies, sociology of education, intercultural education, and international development.

*The Politics and Governance of Basic Education*

Brian Levy 2018-09-05 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world, economic inclusion has risen to the top of the development discourse. A well-performing education system is central to achieving inclusive development - but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased, but quality remains low, with weaknesses in governance comprising an important part of the explanation. The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the

public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process, combining practical steps to achieve incremental gains to re-orient the system towards learning.
