### **Chromatography Literature**

Austin V. Signeur 1979-09 The bibliography which follows represents an effort to provide the active or potential worker in the field of gas chromatography with references to the theory, methodology, and applications of this phase of chemistry. A review of the cited references will afford background for proposed applications, suggest possible solution of a problem, furnish an acquaintance with trends and current work being conducted, and furnish a realization of the possibilities and potentialities of a

technique for the separation, identification, and more recently-preparation of materials. To augment the numerous literature references, titles of papers presented at various scientific meetings are given. Some of these papers have not been published, but they represent a part of the literature of this technique since they indicate the progress and thinking of workers in this field, and provide the opportunity for those with mutual interests to communicate with each other for further details. To afford ready referral for additional information, references are given, when available, to Chemical Abstracts, or to the abstract in the program of the meeting. To accommodate those who may desire microfilm or photostatic copies of the published works, complete pagination is given rather than initial page references. Austin V. Signeur

Obesity Shamim I. Ahmad  
2015-10-19 This book brings a comprehensive treatise about obesity, examining the measures that can be taken to stop and even reduce obesity if these right measures are taken in time. Recent studies show that obesity is on the increase at an alarming rate, especially in the industrialized and affluent countries. A number of reasons have been put forward for this increase, including life style choices, over-eating, over-use of commercially processed

food, addiction for fast food, high caloric diet specially containing high levels of sugar and fat, lack of exercise and sedentary life style. Also genetic make up has been associated with obesity. Obesity can lead to a variety of lethal diseases, notably coronary heart disease, cancer and diabetes. These diseases account for the highest number of human death amongst all other causes. There are also a number of other side effects associated with obesity including increased stress, loss of intelligentsia, pancreatitis, premature birth and osteoarthritis. In recent years media have been playing important roles in highlighting the lethality and damage caused by obesity, nevertheless no significant effects can be seen in the population and obesity remains on the increase, especially amongst children. The editors believe that it is important that more education, campaign and research are used to stop this increasing disease.

### **Inorganic Photochemistry**

Detlef Bahnemann 2022-06-25

The handbook comprehensively covers the field of inorganic photochemistry from the fundamentals to the main applications. The first section of the book describes the historical development of inorganic photochemistry, along with the fundamentals related to this multidisciplinary scientific field. The main experimental techniques employed in state-of-art studies are described in detail in the second section followed by a third section including theoretical investigations in the field. In the next three sections, the photophysical and photochemical properties of coordination compounds, supramolecular systems and inorganic semiconductors are summarized by experts on these materials. Finally, the application of photoactive inorganic compounds in key sectors of our society is highlighted. The sections cover applications in bioimaging and sensing, drug delivery and cancer therapy, solar energy
