## *Why Killer Products Don't Sell*

Ian Gotts 2008-12-22 Coming from conversations with executive teams of technology companies, venture capitalists, and M&A advisers, the insights contained in *Why Killer Products Don't Sell* are gold dust. First the book lays bare the claim that sales is sales. It exposes the 4 very different 'Buying Cultures' and how they should be approached: Value Offered, Value Added, Value Created, and Value Captured. But it also gives a proven methodology for assessing a company's product mix ('offering' vs 'buying culture'), and a transformation approach to optimize sales and improve competitiveness.

## **Managing Data Science**

Kirill Dubovikov 2019-11-12 Understand data science concepts and methodologies to manage and deliver top-notch solutions for your organization  
Key Features Learn the basics

of data science and explore its possibilities and limitations  
Manage data science projects and assemble teams effectively even in the most challenging situations Understand management principles and approaches for data science projects to streamline the innovation process  
Book Description Data science and machine learning can transform any organization and unlock new opportunities. However, employing the right management strategies is crucial to guide the solution from prototype to production. Traditional approaches often fail as they don't entirely meet the conditions and requirements necessary for current data science projects. In this book, you'll explore the right approach to data science project management, along with useful tips and best practices to guide you along the way. After understanding the practical applications of

data science and artificial intelligence, you'll see how to incorporate them into your solutions. Next, you will go through the data science project life cycle, explore the common pitfalls encountered at each step, and learn how to avoid them. Any data science project requires a skilled team, and this book will offer the right advice for hiring and growing a data science team for your organization. Later, you'll be shown how to efficiently manage and improve your data science projects through the use of DevOps and ModelOps. By the end of this book, you will be well versed with various data science solutions and have gained practical insights into tackling the different challenges that you'll encounter on a daily basis. What you will learn

Understand the underlying problems of building a strong data science pipeline  
Explore the different tools for building and deploying data science solutions  
Hire, grow, and sustain a data science team  
Manage data science projects

through all stages, from prototype to production  
Learn how to use ModelOps to improve your data science pipelines  
Get up to speed with the model testing techniques used in both development and production stages  
Who this book is for  
This book is for data scientists, analysts, and program managers who want to use data science for business productivity by incorporating data science workflows efficiently.  
Some understanding of basic data science concepts will be useful to get the most out of this book.

### **Beacon Technologies**

Stephen Statler 2016-06-16

Learn the key standards—iBeacon, Eddystone, Bluetooth 4.0, and AltBeacon—and how they work with other proximity technologies. Then build your understanding of the proximity framework and how to identify and deploy the best solutions for your own business, institutional, or consulting needs. Proximity technology—in particular, Bluetooth beacons—is a major source of business opportunity, and this book provides everything you need to know to architect a solution to capitalize on that opportunity. What You'll Learn Understand the disruptive implications of digital-physical convergence and the new applications it makes possible Review the key standards that solutions developers need to understand

to capitalize on the business opportunity of proximity technology Discover the new phenomenon of beacon networks, which will be hugely significant in driving strategic decisions and creating wealth See other technologies in the proximity ecosystem catalyzed by and complementary to Bluetooth beacons, including visual light communication, magnetic resonance, and RFID Examine the Beacosystem framework for analyzing the proximity ecosystem Who This Book Is For Solutions architects of all types—venture capitalists, founders, CEOs, strategists, product managers, CTOs, business developers, and programmers Stephen Statler is a writer, public speaker, and consultant working in the beacon ecosystem. He trains and advises retailers, venue owners, VCs, as well as makers of beacon software and hardware, and is a thought leader in the beacosystem community. we would want to achieve regardless of their proven positive impacts on a single bottom line, as they are practices that benefit the environment and society in dynamic ways that for too long have been overlooked.

**Book Summary** Executive Reads 2015-08-27 Should you spend 14 hours read the whole book? Did you already read it and forget the key ideas? Executive Reads to the rescue! In *Crossing the Chasm*, Geoffrey A. Moore popularized the Technology Adoption Life Cycle, known elsewhere as the Product Adoption Curve or Innovation Adoption Curve. Contained in this useful model are terms you've heard but may not truly understand: innovators, early adopters, early majority, late majority, and laggards. Between the early market segments (innovators and early adopters) and the mainstream market segments (early and late majorities) lies *The Chasm*. *Crossing the Chasm* explains the perils of navigating the Technology Adoption Life Cycle

and introducing a new high-tech product. Useful today as it was when it was originally written. Whether you seek to save time in understanding this seminal work, want to see if you should read the full-length book, or want to refresh your memory of what it said, Executive Reads provides you with a clear and concise summary. Each summary also includes a full-color infographic summarizing the main concepts.

**Idea Work 3** Brian Glassman 2010-04-30 Directors of Product Development, VPs of R&D, and Innovation Consultants should have this book on their shelves! Dr. Brian Glassman, a Ph.D. in Innovation Management from Purdue University, provides a detailed and authoritative review of the front-end of innovation, idea generation, and idea management. Plus, his seminal process model, explained in detail, provides innovation practitioners a framework with which to generate ideas in a controlled manner, and then capture,

screen, store, a diffuse those ideas throughout their enterprises. This powerful model can employ the best idea generation methods, such as Blue Ocean Strategies, IDEO, TRIZ, and more; resulting in a steady stream of disruptive to incremental ideas for new products and services. This seminal work is highly authoritative and separates itself from the rest of the innovation literature by providing insights cited by highly creditable sources, and by providing structured arguments based on data driven research.

*Camels, Tigers & Unicorns: Re-thinking Science And Technology-enabled Innovation*

Uday Phadke 2017-02-27 The commercialisation of science and technology enabled

innovation is a serious topic of interest for a wide range of global audiences who share one common objective: to understand how science and technology based ideas can be turned into commercial value more effectively. Despite the vast number of publications addressing entrepreneurship, innovation and strategy there is relatively little in the literature which systematically addresses the structures, processes and mechanisms involved in turning ideas into commercially valuable propositions: this book is intended to directly address this gap. The approach in *Camels, Tigers & Unicorns* consists of three fundamental strands: The contents of this book should be of interest to a wide range of audiences including entrepreneurs; leaders and managers in technology firms; scientists and technologists engaged in innovation in academic institutions and corporate environments; lone inventors; groups of scientific entrepreneurs operating
