[Decisions at Gettysburg](#) Matt Spruill 2011-03-16 The Campaign and Battle of Gettysburg have inspired scrutiny from virtually every angle. Standing out amid the voluminous scholarship, this book is not merely one more narrative history of the events that transpired before, during, and after those three momentous July days in southern Pennsylvania. Rather, it focuses on and analyzes nineteen critical decisions by Union and Confederate commanders that determined the particular ways in which those events unfolded. Matt Spruill, a retired U.S. Army colonel who studied and taught at the U. S. Army War College in Carlisle, Pennsylvania, contends that, among the many decisions made during any military campaign, a limited number—strategic, operational, tactical, organizational—make the difference, with subsequent decisions and circumstances proceeding from those defining moments. At Gettysburg, he contends, had any of the nineteen decisions he identifies not been made and/or another decision made in its stead, all sorts of events from those decision points on would have been different and the campaign and battle as we know it today would appear differently. The battle might have lasted two days or four days instead of three. The orientation of opposing forces might have been different. The battle could well have occurred away from Gettysburg rather than around the town. Whether Lee would have emerged the victor and Meade the vanquished remains an open question, but whatever the outcome, it was the particular decision-making delineated here that shaped the campaign that went into the history books. Along with his insightful analysis of the nineteen decisions, Spruill includes a valuable appendix that takes the battlefield visitor to the actual locations where the decisions were made or executed. This guide features excerpts from primary documents that further illuminate the ways in which the commanders saw situations on the ground and made their decisions accordingly.

**A Companion Volume to Dr. Jay A. Goldstein's Betrayal by the Brain** Katie Courmel 2013-04-03 Dr. Jay A. Goldstein's Betrayal by the Brain can be a daunting treatise to the layperson as well as a challenge for the physician who is not versed in neurology, psychiatry, immunology, and endocrinology. Here, in A Companion Volume to Dr. Jay A. Goldstein's Betrayal by the Brain: A Guide for Patients and Their Physicians, Author Katie Courmel, a longtime sufferer of chronic fatigue syndrome and fibromyalgia, presents in layperson's terms the salient points of the book to lead readers to an understanding of Dr. Goldstein's theory and methods of treatment. This guide provides CFS and FMS patients with an understanding of how their brains should function as opposed to how they are now dysfunctioning. It explains the proper role and function of each brain structure and neural assembly and the neurochemicals believed to be implicated in CFS and fibromyalgia along with the dysfunctions found in CFS/FMS patients. These dysfunctions, as a whole, form the basis of Dr. Goldstein's unified theory behind the possible causes of CFS and FMS. Patients involved in or contemplating Dr. Goldstein's treatment can use A Companion Volume to Dr. Jay A. Goldstein's Betrayal by the Brain to gain an explanation of the process from a firsthand perspective and can follow along to learn why they are given particular drugs and what response Dr. Goldstein hopes to elicit from their bodies. This understanding gives patients a sense of control and helps them weather the ups and downs their bodies experience as a normal response to the treatment. The strength of A Companion Volume to Dr. Jay A. Goldstein's Betrayal by the Brain lies in its ability to simplify without sacrificing the body of information that one must understand to make sense of the multitude of seemingly unrelated manifestations of these diseases of the brain. A thorough understanding will allow sufferers of CFS/FMS to approach Dr. Goldstein's treatment method with an open mind and improve their chances for success. Specific questions answered for readers include: how safe is this protocol? should I go alone

or take a companion? what should I expect during my initial consultation? what are the effects of so many drugs? why doesn't the same drug work for everyone? if my treatment is successful, how long will it last? what happens when I leave Dr. Goldstein's care? A Companion Volume to Dr. Jay A. Goldstein's Betrayal by the Brain prepares readers for a unique, sometimes scary, often perplexing, hopefully miraculous, leap-of-faith experience. It helps patients deal with the very natural sense of uneasiness they may be feeling and helps them understand, in layperson's terms, what Dr. Goldstein's protocol can accomplish and how it can be so successful.
