The 19 full papers were selected from 49 submissions and present novel, and innovative work in areas including in art, science, design and engineering regarding computer-based systems or devices that provide intelligent human interaction or entertainment experience. The papers are grouped in sessions on thematical issues on Big Ideas and Ethics; Haptics, Audio, and Internet of Things (IoT); Industry and Government; Machine Learning (ML); and Extended Reality (XR) and Human Computer Interaction (HCI).

3ds Max 4 Magic Sean Bonney 2001 3ds Max 4 Magic follows the same project-based pedagogy that has made previous Magic titles a success. The primary goals are to present changes in functionality, best practices, and inspirational effects. Each project is 10 to 15 pages in length

and provides instruction as well as suggestions for enhancing or modifying the project/effect. Each page is designed in a 3-column format with step-by-step instructions on the left and corresponding graphics (or code) in the middle. The third column is used to provide additional tips and tricks. Any effect, technique, or tip can easily be customized to fit the readers'

Across Space and Time Arianna Traviglia 2025-10-01 This volume presents a selection of the best papers presented at the forty-first annual Conference on Computer Applications and Quantitative Methods in Archaeology. The theme for the conference was Across Space and Time, and the papers explore a multitude of topics related to that concept, including databases, the semantic Web, geographical information systems, data collection and management, and more.
