### Reform and Resistance in Schools and

Classrooms Donna E. Muncey 1996-01-01 What constitutes better schooling for today's youth? In 1984 educational theorist Theodore R.Sizer formulated nine Common Principles to answer this question and launched The Coalition of Essential Schools, an organization of schools attempting to change their own structure, curriculum, pedagogy, and power relations according to Sizer's Principles. This important book, the first comprehensive look at Coalition schools, charts the course of reform at eight charter member schools. Donna E. Muncey and Patrick J. McQuillan, experts in anthropology as

well as education, conducted a five-year ethnographic study to understand what happened in Coalition schools. The authors looked at curricular and pedagogical developments; how changes affected individual students, teachers, administrators, and other school personnel; and how American cultural beliefs influenced efforts to change.

### **Developing Numeracy in the Secondary**

**School** Howard Tanner 2020-03-26 As the National Numeracy Strategy (NNS) extends into secondary schools this book for trainee and practicing mathematics teachers provides practical guidance on developing effective strategies for the teaching of numeracy at KS3 and 4 based on the DfEE requirements. The teaching and learning approaches suggested in the NNS are analyzed and explained using case-study examples from secondary schools. Many of these ideas were developed by teacher inquiry groups in the Raising Standards in Numeracy project. The book includes examples of pupils'

work; lesson plans and pupil activities; ideas for using ICT to enhance mathematics; teacher guidance on both teaching and assessment; and ideas for developing numeracy across the curriculum. This book offers an introduction to the subject of numeracy accompanied by lesson ideas and practical guidance. It will prove a valuable resource for all trainee and new mathematics teachers.
