#RhodesMustFall B. Nyamnjoh 2016-04-18 This book on rights, entitlements and citizenship in post-apartheid South Africa shows how the playing field has not been as levelled as presumed by some and how racism and its benefits persist. Through everyday interactions and experiences of university students and professors, it explores the question of race in a context still plagued by remnants of apartheid, inequality and perceptions of inferiority and inadequacy among the majority black population. In education, black voices and concerns go largely unheard, as circles of privilege are continually regenerated and added onto a layered and deep history of cultivation of black pain. These issues are examined against the backdrop of organised student protests sweeping through the country's universities with a renewed clamour for transformation around a rallying cry of Black Lives Matter. The nuanced complexity of this insightful analysis of the Rhodes Must Fall movement elicits compelling questions about the attractions and dangers of exclusionary articulations of belonging. What could a grand imperialist like the stripling Uitlander or foreigner of yesteryear, Sir Cecil John Rhodes, possibly have in common with the present-day nimble-footed makwerekwere from Africa north of the Limpopo? The answer, Nyamnjoh suggests, is to be found in how human mobility relentlessly tests the boundaries of citizenship.

Angels 1999 In the 1990s alone, more than 400 works on angels have been published, adding to an already burgeoning genre. Throughout the centuries angels have been featured in, among others, theological works on scripture; studies in comparative religions; works on art, architecture and music; philosophical, sociological, anthropological, archeological and psychological works; and even a book length psychoanalytical study of the implications that our understanding of angels has for our understanding of sexual differences. Access to the multitude of angelic works is simplified with this bibliography, which lists 4,355 works, arranged alphabetically by author. Each entry contains a source for the reference, often a Library of Congress call number followed by the name of a university that holds the work. Key words pertaining to the works are included when available, and over 750 of the entries are annotated. Extensive indexes to names, subjects and centuries provide further utility.

Mapping the Digital Divide in Africa Bruce Mutsvairo 2025-10-01 Despite issues associated with the digital divide, mobile telephony is growing on the continent and the rise of smartphones has given citizens easy access to social networking sites. But the digital divide, which mostly reflects on one's race, gender, socioeconomic status or geographical location, stands in the way of digital progress. What opportunities are available to tame digital disparities? How are different societies in Africa handling digital problems? What innovative methods are being used to provide citizens with access to critical information that can help improve their lives? Experiences from various locations in several sub-Saharan African countries have been carefully selected in this collection with the aim of providing an updated account on the digital divide and its impact in Africa.

Indian Insects S Ramani 2019-10-16 Insects are the most interesting and diverse group of organisms on earth, many of which are useful as pollinators of crops and wild plants while others are useful as natural enemies keeping pestiferous insects in check. It is important to conserve these insects for our survival and for this the diversity of insect species inhabiting the different ecosystems of our country must be known. The cornerstone to studies of any kind of organismal diversity is their taxonomic identity. Even after over two and half centuries of studies, so little is known of the insect wealth of our country. It has contributions from taxonomists who have been studying Indian insects for long, this book offers up to date information on many important groups of Indian insects seeking to fill the lacuna of a long felt need for a comprehensive work on the taxonomy of Indian insects. Salient features: Provides an up-to-date taxonomy of major insect groups of India Presents identification keys with illustrations of several important groups of Indian insects Gives a new insight into why insects are so abundant Addresses fundamental questions in mechanoreception and cross kingdom interactions using insects as model systems Indian Insects: Diversity and Science is a

festchrift to Professor C. A. Viraktamath, an insect taxonomist par excellence. It has been designed to cater to the needs of academicians, researchers and students who wish to identify insects collected from local environments and will be an invaluable aid for those working in the areas of systematics, ecology, behaviour, diversity and the conservation of insects.

Online around the World Laura M. Steckman 2017-05-24 Covering more than 80 countries around the world, this book provides a compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile Apps* will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.

Healthcare in Motion Cecilia Vindrola-Padros 2018-08-17 How does the need to obtain and deliver health services engender particular (im)mobility forms? And how is mobility experienced and imagined when it is required for healthcare access or delivery? Guided by these questions, *Healthcare in Motion* explores the dynamic interrelationship between mobility and healthcare, drawing on case studies from across the world and shedding light on the day-to-day practices of patients and professionals.
