**Designing Commercial Interiors** Christine M. Piotrowski 2010-01-26

The definitive reference on designing commercial interiors-expanded and updated for today's facilities Following the success of the ASID/Polsky Prize Honorable Mention in 1999, authors Christine Piotrowski and Elizabeth Rogers have extensively revised this guide to planning and designing commercial interiors to help professionals and design students successfully address today's trends and project requirements. This comprehensive reference covers the practical and aesthetic issues that distinguish commercial interiors. There is new information on sustainable design, security, and accessibility-three areas of increased emphasis in modern interiors. An introductory chapter provides an overview of commercial interior design and the challenges and rewards of working in the field, and stresses the importance of understanding the basic purpose and functions of the client's business as a prerequisite to designing interiors. This guide also gives the reader a head start with eight self-contained chapters that provide comprehensive coverage of interior design for specific types of commercial facilities, ranging from offices to food and beverage facilities, and from retail stores to health care facilities. Each chapter is complete with a historical overview, types of facilities, planning and interior design elements, design applications, a summary, references, and Web sites. New design applications covered include spas in hotels, bed and breakfast inns, coffee shops, gift stores and salons, courthouses and courtrooms, and golf clubhouses. In keeping with the times, there are new chapters focusing on senior living facilities and on restoration and adaptive use. A chapter on project management has been revised and includes everything from proposals and contracts to scheduling and documentation. Throughout the book, design

application discussions, illustrations, and photographs help both professionals and students solve problems and envision and implement distinctive designs for commercial interiors. With information on licensing, codes, and regulations, along with more than 150 photographs and illustrations, this combined resource and instant reference is a must-have for commercial interior design professionals, students, and those studying for the NCIDQ licensing exam. **Dining by Design** Edie Lee Cohen 1984 Abstract: Guidelines for creating the special mystique that marks a successful restaurant are outlined in this beautifully illustrated guide for interior designers and restaurateurs. A combination of factors related to design, table service, and food work together to make a restaurant successful. Designers, clients, and restaurateurs must be willing to take risks in order to create a facility that is novel enough to be entertaining and memorable. Descriptions are provided of well-designed restaurants, how they were conceived, and the factors that led to their success. Characteristics important to restaurants' success such as ambience, lighting, acoustics, graphics, and budgets are discussed in in-depth interviews with experts in these fields. Categories of restaurants for which specific descriptions are provided include fast food facilities, hotel dining facilities, ballrooms, clubs and discotheques, bars and cocktail lounges, and corporate dining facilities. Restaurants with unique themes, architectural approaches, or historic designs are also described. Beautiful color photographs and design layouts of selected restaurants supplement the text. (aje).
