**Arthurian Animation** Michael N. Salda 2013-07-30 This is an exploration of the potent blend of Arthurian legend, cartoon animation, and cultural and artistic trends from 1933 to the present. In more than 170 theatrical and televised short cartoons, televised series and specials, and feature-length films from *The Sword in the Stone* to *Shrek the Third*--all covered in this book--animators have repeatedly brought the Round Table to life. Although these productions differ greatly in tone and intent--spanning spectra from comic to sober, fantastic to realistic, and entertaining to edifying--they share in the proof of Camelot's continuing relevance in the modern world.

**Weapons Technology** Sabine Lorca 2025-03-10 Weapons Technology explores the fascinating relationship between real-world military technology and its depiction in manga. The book examines how advancements in weapon systems, from firearms to cyber warfare and drone technology, are reimagined in popular manga series. By analyzing the technological aspects of both, the book reveals how manga often reflects, and potentially shapes, public perceptions of advanced military technology. The book provides a historical and technological context for understanding weapon systems, tracing their evolution and exploring the science behind them. It analyzes specific manga series, demonstrating how real-world technologies like advanced armor systems and futuristic combat scenarios are adapted into fictional narratives. This approach highlights the influence of actual military innovation on imaginative storytelling. Organized into three parts, the book first introduces fundamental concepts of weapons technology. Next, it presents manga case studies that examine how these technologies are incorporated and adapted. Finally, it synthesizes these observations to reveal broader

patterns of influence and discusses the ethical implications, making it valuable for anyone interested in the intersection of technology, military history, and culture.

*Atlas of Imagined Cities* Matt Brown 2023-10-12 From the Ghostbusters HQ in New York to Nemo's fish tank in Sydney, from the Phantom of the Opera's Parisian lair to scenes from Grand Theft Auto in LA, this is an amazing atlas of imaginary locations in real-life cities around the world. Locations from film, TV, books, computer games and comics are ingeniously plotted on a series of beautiful vintage-looking maps. Featuring 14 of the world's greatest cities, the maps show exactly where your favourite characters lived, loved, worked and played, and where iconic scenes took place. The locations have been painstakingly tracked down, mapped, annotated and wittily divulged by the authors, and an extensive index helps you find them all. Within the pages of this book, you'll discover: • Where in London super-spies James Bond and George Smiley are neighbours. • The route of the exciting San Francisco car chase in Bullitt. • The Tokyo homes of all the magical girls from the classic Sailor Moon anime. And many more fascinating locations drawn from the world's imagination. Accompanying the maps are illuminating essays that explain how the authors came to their decisions, along with explorations of the key locations and fun timelines of imaginary events. Find out how to get to Sesame Street, where to join Starfleet and thousands of other places besides, in this indispensable guidebook to all those places you always wanted to visit - if only they were real.

*Culture and Foreign Language Education* Wai Meng Chan 2015-07-31 The teaching of culture and interculturality is today viewed as an integral part of foreign language education. This book presents insights from recent research on the role of culture in second/foreign and heritage language education. It contains 14 chapters including an introductory chapter that discusses diachronically the evolving notion of culture and

how the sociocultural view of culture as a complex and dynamic concept informs language teaching and language learning research. The chapters following the introduction are organised in four parts focusing on: 1) the teacher's role in integrated language and culture learning; 2) the interrelationship between culture, identity, and language learning and use; 3) the effect of culture on learner characteristics which impact language learning processes and outcomes; and 4) curriculum development aimed at fostering language and culture learning. The chapters in Parts 1 to 3 present contributions from current research - either in the form of the authors' original studies or comprehensive reviews of relevant essential research - which bears important implications for curricular practice in foreign language and language teacher education. This close link between research, theory and practice is also maintained in the two chapters in Part 4, which present developmental projects based on well-grounded theoretical frameworks.

*Critical Approaches to Transmedia Storytelling in K-Pop* Nicholas E. Miller 2026-01-08 This volume explores how K-pop has evolved beyond a musical genre into a global cultural phenomenon with its own transmedia ecosystem, arguing that the transmedial approach constitutes not merely a marketing strategy, but a sophisticated artistic framework that redefines the relationship between music, narrative, and performance in the digital age.
