**Concepts in Biology** Eldon Enger 2008-01-16 Enger/Ross/Bailey:

Concepts in Biology is a relatively brief introductory general biology text written for students with no previous science background. The authors strive to use the most accessible vocabulary and writing style possible while still maintaining scientific accuracy. The text covers all the main areas of study in biology from cells through ecosystems. Evolution and ecology coverage are combined in Part Four to emphasize the relationship between these two main subject areas. The new, 13th edition is the latest and most exciting revision of a respected introductory biology text written by authors who know how to reach students through engaging writing, interesting issues and applications, and accessible level. Instructors will appreciate the book's scientific accuracy, complete coverage and extensive supplement package.

*Essentials of Oceanography* Alan Trujillo 2019-04-15 For courses in oceanography. Dive in to oceanography with trusted content and innovative media As the bestselling brief book in the oceanography market, Essentials of Oceanography combines dynamic visuals and a student-friendly narrative to bring oceanography to life. The text's engaging features and the extensive suite of animations and videos keep students interested and excited about the material. The 13th Edition creates an interactive learning experience that provides tightly integrated text and digital offerings to make oceanography approachable and digestible for students. An emphasis on the process of science throughout the text provides students with an understanding of how scientists think and work. The new edition also helps students develop the scientific skill of practicing and interpreting data with new Exploring Data features supported by Mastering Oceanography coaching activities. A new Creature Feature provides fun facts about marine animals to engage students. Also available as a Pearson eText or packaged with Mastering Oceanography Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience available within Mastering Oceanography. It lets students highlight, take notes, and review key vocabulary all in one place - even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need, when they need it. Educators can easily share their own notes with students so they see the connection between their eText and what they learn in class. Mastering™ is the teaching and learning platform that empowers you to reach every student. By combining

trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and improves results for each student. Built for, and directly tied to the text, Mastering Oceanography enables an extension of learning allowing students a platform to practice, learn, and apply outside of the classroom. **Ecosystem Services** The National Academies Keck Futures Initiative 2012-04-20 Natural environments provide enormously valuable, but largely unappreciated, services that aid humans and other earthlings. It is becoming clear that these life-support systems are faltering and failing worldwide due to human actions that disrupt nature's ability to do its beneficial work. Ecosystem Services: Charting a Path to Sustainability documents the National Academies' Keck Futures Initiative Conference on Ecosystem Services. At this conference, participants were divided into 14 interdisciplinary research teams to explore diverse challenges at the interface of science, engineering, and medicine. The teams needed to address the challenge of communicating and working together from a diversity of expertise and perspectives as they attempted to solve a complicated, interdisciplinary problem in a relatively short time.

Ecosystem Services: Charting a Path to Sustainability describes how ecosystem services scientists work to document the direct and indirect links between humanity's well-being and the many benefits provided by the natural systems we occupy. This report explains the specific topics the interdisciplinary research teams addressed at the conference, including the following: -how ecosystem services affect infectious and chronic diseases -how to identify what resources can be produced renewably or recovered by developing intense technologies that can be applied on a massive scale -how to develop social and technical capabilities to respond to abrupt changes in ecosystem services -how to design agricultural and aquacultural systems that provide food security while maintaining the full set of ecosystem services needed from landscapes and seascapes -how to design production systems for ecosystem services that improve human outcomes related to food and nutrition -how to develop appropriate methods to accurately value natural capital and ecosystem services -how to design a federal policy to maintain or improve natural capital and ecosystem services within the United States, including measuring and documenting the effectiveness of the policy -how to design a system for international trade that accounts for impacts on ecosystem services -how to develop a program that increases the American public's appreciation of the basic principles of ecosystem services
