Technology and their Impact on the Solution of Contemporary Global Problems held in Tallinn, USSR on January 8-12, 1979. This compilation discusses the character of global problems in the year 2000, prospects of development of leading branches of science and technology, and its capacity to solve global problems. The topics include global problems in the year 2000 and the role of science in their solution; science and technology as factors for future global development; road to scientific-technological culture; and responsibility of scientists in the period of crisis. The energy situation in the world (problems and prospects); mathematics and progress in science and technology; role of information and communication in the solution of global problems; and global public health problems and ways of resolving them are also deliberated in this text. This book is a useful source for students and researchers conducting work on the

development of science and technology in solving global problems.

Technology and Global Problems: The United Nations Advisory Committee on the Application of Science and Technology for Development documents the contributions and roles of the Advisory Committee on the Application of Science and Technology (ACAST) in society and nation development. The book is divided into three parts; the first of which gives a historical perspectives of the committee, including its origin, strategy for development, and plan of action. The second part

enumerates and details the various areas and sectors ACAST assisted and considered in their goal to achieve quality advancement. The last part provides the overview of ACAST programs. The text will be invaluable to government agencies and offices, especially those in charge of community development. Those who want to dig deeper in the existence and role of ACAST will also benefit from the book.
