INTERACTIVE PROJECTABLE CLASSES (IPCs).

Coaching For Language Learning (CFLL) offers solutions to many problems encountered by language teachers and learners, such as where students are not progressing. A new energy and atmosphere are made available through CFLL, where language teachers do not have to teach at all, but exclusively listen and respond. It is

extremely rewarding. CFLL is a new way of teaching and learning based on solid action research in the domain of ESL (English as a Second Language), particularly English for Business. It is also applicable to other contexts in ELT (English Language Teaching) or the teaching of other second languages, and will be useful to anyone working in International Communication, or to improve Spoken Performance and Public Speaking. This book contributes to developing teachers' coaching skills, which is the next step forward in our dedicated efforts to innovating and improving language teaching and learning. You will find here everything you need to know about the coaching approach to language learning, and numerous practical steps you can take to embody this approach - A MUST FOR THE

MODERN TEACHER.

Athlete Transitions into Retirement Deborah Agnew 2021-08-12 Transitions in sport can be either normative (relatively predictable) or non-normative (less predictable) and are critical times in the development of athlete's careers. Whilst retirement from sport is inevitable, the timing of retirement can be less predictable. If an athlete copes well with the transition they may be better able to adjust to life after sport.

However, not coping with the transition can lead to a crisis and negative consequences for the athlete. Transition periods from sport and in particular retirement from sport have been identified as high-risk periods for athletes in terms of psychological distress. However, circumstances surrounding the athlete's retirement are a critical factor in the transition into life after sport. Voluntarily retiring from sport for example, leads to a smoother transition than being forced into retirement through injury or deselection. Research indicates that retirement from sport should be seen as a process rather than a single moment, with many athletes taking up to 2 years to successfully transition out of sport. Currently, there are few bodies of work that are solely devoted to retirement transition. *Athlete Transitions into Retirement: Experiences in Elite Sport and Options for Effective Support* provides contemporary viewpoints on athlete transitions from elite sport in a global context. This volume

is a collaboration of research from leading authors around the world, offering global perspectives to athlete transitions into retirement and is key reading for both researchers and practitioners in the fields of Sport Psychology and Coaching as well as the Athletes themselves.

Introduction to Coaching Psychology

Siobhain O'Riordan 2021-04-28 This collection featuring chapters by leading international practitioners will offer an introduction to coaching psychology for those new to it, including students, trainees, psychologists, and coaches. Introduction to Coaching Psychology covers key topics, including the background and development of coaching psychology, the coach-coachee relationship, coaching psychology approaches and models, and themes such as assessment, contracting, and the setup in coaching psychology practice. Applications in coaching psychology are considered, including a look at particular coaching psychology

specialisms and interventions, as well as discussions about working in organisations, working with young people, and life and personal coaching. Professional practice issues, such as boundaries and best practice, and coaching and diversity, are also explored. Furthermore, a review of coaching psychology research is presented. The book also offers a rich collection of case studies to illustrate the practice of coaching psychology in a real-world setting and concludes with a consideration of the future of the field. This timely and accessible book will be essential reading for anyone new to the field, as well as coaches, psychologists, and counsellors interested in the theory, research, and practice of coaching psychology.

What is a Coach? John Lyle 1985

The Complete Guide to Coaching at Work

Perry Zeus 2000 Coaching has taken on a permanent role as a way of improving individual performance within an organization. This book is for people interested in becoming coaches within an organization and those already practicing. It explains the skill and competencies required to be an outstanding coach at work. The book clearly defines and explains the nature

of coaching and how it works, outlining the different theories and models to present a balanced, objective perspective of the subject. The authors show that coaching is an on-going dialogue: a collaboration between two individuals that encourages learning, development and work performance improvement in the pursuit of skill development goals. It can be adopted at any level in the workplace, educational institution, sporting arena or personal life. The authors reveal what personal qualities are necessary in order to be a successful coach. They discuss coaching and communication skills, and show you how to set strategic goals and develop an action plan. The book also analyzes the contribution of coaching to the processes of change and learning, explaining the different styles of learning, the importance of establishing a learning culture within an organization, and the degree of self-exploration necessary for the individual to achieve sustained behavioral change. The

authors also consider in greater detail three specific coaching areas: coaching in call centers, sales coaching, and career coaching, and explain the differences from other related occupations that are often associated with coaching, such as consulting, mentoring, training and counseling, and how all of them work together.
