Building Design for Wind Forces: A Guide to ASCE 7-16 Standards

Rima Taher 2018-08-24 Expert coverage of ASCE 7-16-compliant, wind-resistant engineering methods for safer, sounder low-rise and standard multi-story buildings Using the hands-on information contained in this comprehensive engineering guide you will be able to design and construct safer buildings that will better withstand extreme wind forces. Written by a recognized structural design expert, the book explains the general concepts and principles involved in the design of buildings and structures for wind forces. Structural systems used to resist wind forces are outlined and explained, in the context of both low-rise and high-rise buildings. Building Design for Wind Forces provides easy-to-follow summaries of complex ASCE 7-16 wind load provisions and shows how to apply the corresponding design procedures using practical examples. A detailed discussion of typical structural damage caused by extreme wind events such as hurricanes and tornadoes is presented along with design recommendations. Current wind engineering activities and recent research developments are discussed, and a general overview of wind tunnel procedures and an introduction to the concept of database-assisted design (DAD) is provided. Building Design for Wind Forces covers: •Wind forces and wind effects on buildings and structures •Wind load provisions of the ASCE 7-16 standard •Damage to structures caused by extreme wind events •Wind engineering activities and research trends •Structural systems for lateral loads •Tall buildings •Wind design procedures and wind load parameters •Wind loads on the Main Wind Force Resisting System (MWFRS) •Wind loads on Components and

Cladding (C&C) •Wind loads on building appurtenances and other structures •Wind tunnels and the wind tunnel procedure •Database-assisted design (DAD)

The National Guide to Educational Credit for Training Programs

2002 (Ace) American Council on Education 2005 For over 25 years, this guide has been the trusted source of information on over 6,000 educational programs offered by business, labor unions, schools, training suppliers, professional and voluntary associations, and government agencies. These programs provide educational credit to students for learning acquired in noncollegiate settings. Each entry in the comprehensive National Guide provides: BL Course title as assigned by the participating organization BL Location of all sites where the course is offered BL Duration in contact hours and days or weeks BL The period during which the credit recommendation applies BL The purpose for which the course was designed BL The abilities or competencies acquired by the student upon successful completion of the course BL The teaching methods, materials, equipment, and major subject areas covered BL College credit recommendations offered in four categories (by level of degrees) and expressed in semester hours and subject area(s) in which credit is applicable. The introductory section includes the Registry of Credit Recommendations, an ACE College Credit Recommendation Service transcript system.

Wetland Creation and Restoration Jon A. Kusler 1990 This is a preliminary evaluation of the status of the science of wetland creation and restoration in the United States. It contains a series of regional reviews. Each review summarizes wetland creation and restoration experiences in broadly defined wetland regions (e.g. Pacific coastal wetlands, wooded wetlands of the Southeast). It also includes a series of theme papers, covering a wide range of topics of general application to wetland creation and restoration (hydrology, management techniques, planning).
